Fund Overview

Why Invest in Green Effects

Fund Aim

The objective of the fund is to achieve long term capital growth and income through investing in companies with a commitment to supporting the environment and socially just production and work methods. The fund provides clients with a socially responsible or ethical investment focus with a well diversified investment alternative. It provides a cost efficient investment fund with a defined socially responsible investment focus.

Diversification

The fund offers investors a diversified exposure to global equity markets (US, Asia, Europe etc) and a broad base of socially responsible sectors and underlying companies.

Strong Track Record

The fund has achieved a very strong track record of outperforming global equity market indices and is one of the top performing funds within its peer group resulting in a 5-star rating from Morningstar Fund Research. The fund was established in October 2000 and as at end of July 2016 had assets of over €55m.

Key Information

About the NAI Index

In April 1997 the German magazine Natur developed the Natur-Aktien- index (the NAI index) as a measure of stock market performance of selected ethical, ecological and socially sustainable stocks. The NAI currently comprises 30 stocks which must meet a number of strict selection criteria.

Companies involved in the following activities are excluded from the NAI Index:

- ✗ Production or sale of nuclear energy or nuclear technology
- ✗ Production or sale of arms
- ✗ Discrimination against social or ethnic minorities
- ✗ Manufacturing products through child labour
- ✗ Production processes damaging to the environment
- ✗ Releasing genetically manipulated products

Manager's Commentary

The Green Effects Fund ended October at a NAV price of **€210.21** which was a return of **+3.20%** for the month. Following a nervous start to the month, October finished with a flourish with gains (in euro) of on average 3.3% being recorded by the main equity markets. The cautious start to the month was the result of apprehension ahead of key central bank meetings, in particular the ECB, Brexit, Catalonia independence as well as uncertainty over US fiscal policy. Our view in Cantor had been that given the continuing weak inflation environment, which in the absence of wage growth is likely to continue well into 2018, that the rate of asset purchase tapering would be gradual, that the programme would be extended into the third-quarter of 2018 and that interest rates in the euro-zone are unlikely to increase until Q1 2019. This is exactly the scenario that played out at the October 26th meeting and resulted in a strong rally in euro-zone equities and bonds as well as a weakening of the euro against the dollar. In company specific news during the month, **Svenska Cellulosa** reported results well ahead of market expectations with group sales and EBITDA margins beating forecasts. **Smith & Nephew** was one of the best performers on the month as investors reacted positively to the news that activist investor Elliot had built a stake in the company with a view to pushing for a strategic shake up of the business and potentially selling some non-core business units. The Green Effects Fund remains well positioned for continued solid returns from Eurozone equities with circa 33% of the portfolio invested in the region. The other area we continue to see meaningful upside in is Emerging Markets and in particular the Japanese equity market (18% of the Fund).

Tesla Motors Inc. is an American automotive and energy storage company that designs, manufactures and sells electric cars, electric vehicle powertrain components, and battery products. Tesla Motors is a public company that trades on the NASDAQ stock exchange.

Risk Profile

The chart above provides an indicative risk reward profile across each individual investment asset class. The Green Effects Fund is diversified across global equities and therefore offers investors a higher risk reward profile relative to other asset classes.

Fund Risk Rating

In order to explain the level of risk in the Green Effects fund, we have used a risk & reward scale from 1-7 in accordance with guidelines recommended by the European Securities and Markets Authority ("ESMA"). For example, a risk rating of 1 would indicate a very low risk investment, while a 7 would indicate a very high risk investment.

This risk rating is calculated based on the historical volatility of weekly returns over the previous 5 year period. Based on this methodology the risk rating of the Green Effects fund is a 5 which indicates a Medium to High risk profile.

Monthly Company Focus

Richard Power, Director of Stockbroking

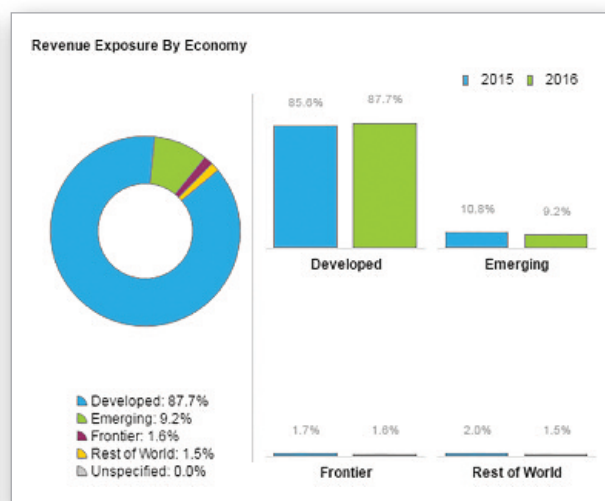

Tomra Systems ASA is a Norwegian multinational corporation which creates sensor-based solutions for optimal resource productivity. It was founded in 1972 and has headquarters in Asker, Norway. Some key Collection Solution markets are Germany, the USA and the Nordic countries and that is why Tomra focuses a lot of their resources on these areas, with central departments located in Koblenz, Germany and Shelton, Connecticut. Tomra's operations are broken up into 2 service divisions: Collection Solutions and sorting Solutions. The company is one of the main global players in these markets and employs over 2000 people. Consumers go through almost 1.8 trillion beverage containers every year, representing a vast amount of packaging material that can be collected and reused or recycled, it also represents a massive opportunity for companies like Tomra Systems.

Tomra offers collection solutions for waste materials to consumers. Tomra provides reverse vending, compaction and material recovery services for suitable waste materials. Every year Tomra facilitates the collection of close to 35 billion empty drinking cans and bottles. Currently Tomra have installed approximately 70,000 reverse vending systems across more than forty markets to encourage people to recycle their used cans. The used cans that they receive are then compacted together or recovered into an item of use and sold for profit.

Tomra Sorting Solutions creates sensor based sorting machines for recycling, food, mining and specialty products. Tomra Sorting unites four strong brands: Titech for recycling, CommodasUltrasort for mining, Odenburg and Best for food and Best for specialty products, tobacco and raw materials. This alliance between Tomra's subordinates makes them the leading provider of sensor based sorting machines worldwide. Tomra Sorting Solutions offers 15 test centres across the world, access to a vast array of sorting technologies along with a large R&D department and an enhanced service network ensuring that Tomra is close to their consumers.

Tomra have invested significant levels of capital in R&D in recent years in order to create top quality products and machines to boost their competitive advantage in the market and experience sustained growth. They are starting to see the benefits of this investment, having been nominated as a finalist in the category "Best New Packing/Processing Equipment" in the United Fresh New Product Awards, for its state-of-the-art pre-sorter for the fresh cut industry, the Falco.
