Lead Distributor: Cantor Fitzgerald Ireland Ltd. is a Cantor Fitzgerald company, part of the leading global financial services group.
Target Market: Please see page 16 for further details of the Identified Target Market. The product is not suitable for all investors and also is only suitable for a certain portion of the investment portfolio of Target Market investors.

Final Valuation Date: 8th March 2024.

Final Maturity Date: 15th March 2024 (with 8 potential opportunities to redeem early every 6 months after year one).

Product Structure

The Cantor Fitzgerald Ireland Oil & Gas Kick Out Bond IV (the “Bond” or “Investment”) is a 5 year investment with the potential to redeem early or ‘Kick Out’ every 6 months after year 1 with a fixed Bonus Payment. This Bond has 9 potential opportunities to be redeemed on any of the Semi-Annual Valuation Dates between year 1 and year 5.

Kick Outs and Bonus Payments:

Potential Bonus payments are linked to the performance of the 4 blue chip oil & gas companies below.

- Royal Dutch Shell PLC (Bloomberg Ticker: RDSA NA).
- Exxon Mobil Corp (Bloomberg Ticker: XOM UN).
- BP PLC (Bloomberg Ticker: BP/ LN).
- TOTAL SA (Bloomberg Ticker: FP FP).

If each of the 4 Stocks are above their 90% Kick Out Valuation Levels (or have not fallen by more than 10%) on any semi-annual valuation date after year one, the product can Kick Out and redeem early with a return of 100% of the original capital invested along with a Bonus Payment.

The potential Bonus Payments are calculated as 5% for every 6 month period of the term that has elapsed (or 10% per annum) before the bond Kicks Out. If after year one or any subsequent semi-annual period, any of the 4 stocks are below their 90% Kick Out Levels, no return is paid for that period and the Bond rolls onto the next period and the Bonus Payment increases by an additional 5%. The maximum potential return is 50% if the Bond runs for the full 5 year term and Kicks Out at Maturity. Please see the illustrations on page 5 for more details on the range of potential returns during the term and the potential maturity scenarios.

The 90% Kick Out Feature: This Bond has a “90% Kick Out” feature which allows the product to pay out a fixed return provided that none of the 4 Stocks share prices has fallen by more than 10% from their Initial Valuation Levels. The Kick Out levels for this bond are set at the start of the investment term and fixed for the full investment term at 90% of the initial level.

The 50% Protection Barrier: If the Bond has not kicked out previously, at the end of 5 years (on the Final Valuation Date of 8th March 2024), this Bond returns 100% of investors’ capital if the least performing Stock has not fallen by more than 50% from the Initial Price Level.

Additional Protection Feature: This bond also provides the added protection feature that if any of the 4 Stocks are above their Initial Price Level at the Final Valuation Date 100% of investors Capital is returned irrespective of the performance of the other 3 stocks.

Risk: The Bond is categorised as a high risk investment. If after 5 years at the Final Valuation Date the Bond has not Kicked Out and any of the 4 Stocks is more than 50% below the Initial Price Level and if none of the 4 Stocks are above their Initial Price Level, investors’ capital will be reduced by the full amount of the negative performance of the least performing stock over the 5 year term (this is known as a Knock In Event). Investors’ entire capital is therefore at risk. Other potential risks include the financial failure of The Goldman Sachs Group, Inc., Delaware, USA (as guarantor). We would like to draw your attention to “What risks should be considered before investing?” on page 14.

Advice: This product is being marketed on an advisory basis only. Prior to investing, it is important that you take financial advice from your Financial Advisor or from your Cantor Fitzgerald Ireland Portfolio Manager. We also draw your attention to the target market assessment provided on page 16 of this brochure.

WARNING: Your capital is at risk; you may lose some or all of the money you invest.

Investment summary

The Cantor Fitzgerald Ireland Oil & Gas Kick Out Bond IV (the “Bond” or “Investment”) is a 5 year Investment, which may, subject to certain terms, redeem early. Both the capital invested in the Bond as well as the potential investment returns are linked to the performance of 4 Stocks in the oil and gas sector. Royal Dutch Shell PLC (RDSA NA), Exxon Mobil Corp (XOM UN), BP PLC (BP/ LN) and TOTAL SA (FP FP), together referred to as the ‘4 Stocks’. This Bond has a “90% Kick Out” feature so the Bond can produce up to 50% maximum return for investors even if the 4 Stocks depreciate, provided that none of the 4 Stocks share prices has fallen by more than 10% from their Initial Valuation Levels. The 90% Kick Out Levels are set at the start of the investment term as per the table below.

After the first year and every 6 months thereafter, should each of the 4 Stocks be equal to or above their 90% Kick Out Levels set at the start of the investment term, then an early redemption shall occur. Each investor will be repaid 100% of their initial capital plus a fixed Bonus Payment, and the product will terminate early. The potential Bonus Payments are calculated as 5% for every 6 month period that has elapsed (or 10% per annum). If after year one or any subsequent semi-annual period, any of the 4 Stocks are below their Kick Out Levels, the Bond rolls onto the next period and the potential Bonus Payment grows by 5% per semi-annual period for a maximum term of 5 years. The maximum return is 50% if the Bond was to Kick Out at the end of the 5 year term.

At the end of 5 years this Bond returns 100% of investors’ capital provided the least performing Stock has not fallen by more than 50% from the Initial Price Level. 100% of capital is also returned to investors if any stock is above its Initial Price Level on the Final Valuation Date of 8th March 2024 irrespective of the performance of the other 3 stocks. Otherwise if after 5 years, at the Final Valuation Date, any of the 4 Stocks is more than 50% below the Initial Price Level and no stock is above its Initial Price Level, investors’ capital will be reduced by the full amount of the negative performance of the least performing stock from the Initial Price Level to the Final Price Level (this is known as a Knock In Event). Investors’ capital is therefore at risk. (e.g. if the bond has never Kicked Out and no stock is positive on the Final Valuation Date and the least performing stock has fallen by 60% investors capital will be reduced by 60%).

WARNING: If on the Final Valuation Date the Final Price Level of any of the 4 Stocks is more than 50% below its Initial Price Level and if no stock is above its Initial Price Level you will lose more than 50% of your initial investment amount.

WARNING: The return of your capital protected amount at maturity, as well as the Investment Return, will be dependent on the solvency of Goldman, Sachs & Co. Wertpapier GmbH, Frankfurt, Germany as Issuer and The Goldman Sachs Group, Inc., Delaware, USA as Guarantor, if both were to default you will lose some or all of your investment.

Rationale for investing

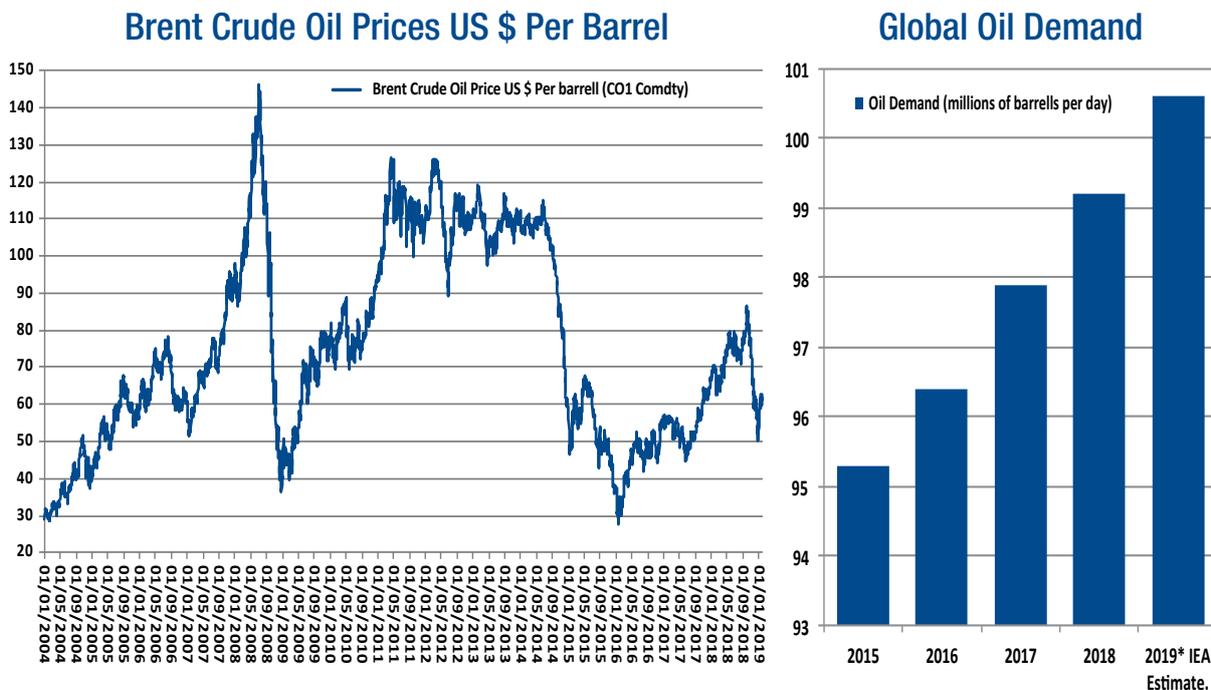

For this Bond Cantor Fitzgerald have selected 4 leading oil & gas companies; Royal Dutch Shell PLC (RDSA NA), Exxon Mobil Corp (XOM UN), BP PLC (BP/ LN) and TOTAL SA (FP FP).

In the period from 2011 to the middle of 2014, the price of a barrel of crude oil predominantly traded over \$100, having traded in a range of \$30 to \$147.50 in the previous decade (2004–mid 2014). The higher oil prices led to increased oil production levels, along with the introduction of new sources of oil. Specifically shale oil became more competitive to produce due to these higher oil prices. The United States in particular increased their production significantly. The “strategic” Saudi/OPEC policy response to the increased oil supply was to maintain production levels, leading to an increase in oil inventories globally and ultimately the brief \$30 low in February 2016. In early October 2018, the price of Brent crude oil reached a four-year high above \$86/bbl, reflecting the legitimate fears of market tightness due to US sanctions on Iran and declining production from Venezuela. This justified calls for producers to raise output. Oil price action in recent months has been quite dramatic. Brent Crude fell from \$86 in early October to \$50 just before Christmas. Today, due to increased production the price is at a level below \$60 a barrel.

Oil prices appear to have overshot to the downside. In addition, many oil & gas companies stock prices have performed poorly along with global stock markets in recent times as the price of Brent Crude Oil has fallen sharply from \$86 in October 2018 to under \$60 currently. As you can see from the charts overleaf Exxon Mobil, Royal Dutch Shell, BP and TOTAL's share prices have all declined significantly, in line with weaker prevailing crude oil prices.

As illustrated by the data from International Energy Agency (see Global Oil Demand chart below) oil demand continues to be growing at a relatively robust rate and is estimated to exceed 100m barrels per day in 2019 for the first time. However, at lower prevailing oil price levels the economics of producing and investing in new shale oil or deep water oil exploration becomes less profitable. Typically when prices are lower investment in new drilling, exploration and production can decline significantly and oil companies tend to spend less on exploration and become more focused on cost reduction. At some future point it is likely that cuts in spending and drilling, together with existing oil field depletion rates will have an impact and significant declines in future production may occur.

Generally a future reduction in supply combined with growing demand for crude oil should help longer term oil prices recover, which in turn should help the share price of the larger oil and gas stocks. These 4 oil & gas stocks are each currently trading significantly below their previous highs (please see stock charts on page 8). If crude oil prices can recover over the coming years, even reverting to the average price of the last decade (c. \$80), it could be a significant catalyst for the shares of these 4 leading global oil companies.

The 4 Stocks – Leading Oil & Gas Companies

Royal Dutch Shell PLC

Royal Dutch Shell PLC, (RDSA NA Equity) explores for, produces, and refines petroleum. The Company produces fuels, chemicals, and lubricants. Shell is geographically diversified and owns and operates gasoline filling stations worldwide. Despite its focus on higher margin production, Royal Dutch Shell is trading at a discount to the overall stock market with a price earnings ratio of 11.25 times 2019 earnings estimates (UK 100 trading on 15.7 times 2019 earnings estimates). Shell currently provides a 6.28% dividend yield and has a market capitalisation of €211 billion Euro. Royal Dutch Shell has also begun to implement a \$25 billion 3 year 2018-2020 share buyback plan.

Exxon Mobil Corp

Exxon Mobil (XOM UN Equity) is one of the world's largest oil & gas companies. Exxon Mobil Corp operates petroleum and petrochemicals businesses on a worldwide basis. The Company's globally diversified operations include exploration and production of oil and gas, electric power generation, and coal and minerals operations. Exxon Mobil also manufactures and markets fuels, lubricants, and chemicals. Exxon shares are currently trading at 16 times 2019 earnings. Exxon Mobil Corp has a 4.6% dividend yield and has a market capitalisation of \$301 billion. Exxon's secure dividend and ongoing success in E&P, among other factors justifies a premium multiple for the stock.

BP PLC

BP plc (BP/ LN Equity) is an oil and petrochemicals company. The Company explores for and produces oil and natural gas, refines, markets, and supplies petroleum products, generates solar energy, and manufactures and markets chemicals. BP has a strong track record of delivery of major oil and gas projects. The company has started 19 major projects covering most hydrocarbon themes (deepwater, unconventional, LNG) in the last 3 years. These are on average below budget (and below industry average cost) and running ahead of schedule. BP is trading at 15 times 2019 earnings estimates (UK 100 trading on 15.7 times 2019 earnings estimates). Some analysts continue to see upside to consensus earnings from additional cost savings progress, and potential valuation upside. BP has a dividend yield of 6.49% and a market capitalisation of £101 billion.

TOTAL SA

Total SA (FP FP Equity) has operations in more than 130 countries and is engaged in every sector of the oil industry. The company explores for, produces, refines, transports, and markets oil and natural gas. The Company also operates a chemical division which produces poly propylene, polyethylene, polystyrene, rubber, paint, ink, adhesives, and resins. Total operates gasoline filling stations in Europe, the United States, and Africa. TOTAL also operates in the renewable energies and power generation sectors.** The stock is trading at 12.6 times 2019 earnings estimates and offers a 5.4% dividend yield.* Following some years of considerable change, Total may be well positioned for growth and transactions in recent years have augmented its position. These acquisitions largely being funded by the sale of non-core assets whilst in the downstream restructuring and divestments offer scope for improvement. Increased focus on exploration also offers scope for resource capture and with it greater confidence in the company's medium term outlook. Total SA has a market capitalisation of €124 billion.*

The 4 Stocks – Leading Oil & Gas Companies

This Bond's returns are linked to the performance of Royal Dutch Shell PLC (RDSA NA), Exxon Mobil Corp (XOM UN), BP PLC (BP/LN) and TOTAL SA (FP FP). There is a positive investment rationale for choosing these 4 Stocks and they may all offer good upside potential. While the stock price levels are to be set as of the Initial Valuation Date of 8th March 2019, for illustrative purposes the current indicative 50% barrier level is illustrated by the red line in the charts below. The current indicative 90%. Kick Out Levels are also illustrated by the green lines in the charts below. However, we have selected these 4 Stocks on the basis of future potential rather than on past performance. Investors should also be aware that past performances are not a reliable indicator of future performances.

How would this Bond have performed in the past?

In order to demonstrate how the Bond would have performed had it been purchased in the longer term, a series of tests to determine the Bond's 'Simulated Past Performance' were carried out. The exact parameters of the Bond were applied to historic daily price information, from the 3rd January 1990 to 6th December 2018, which produced 6,969 observable five year rolling periods. It is important to note that this product is based on 4 stocks we currently have a positive outlook on. However, we would stress we would not necessarily have held the same positive view on these stocks historically. We also note past performance is not a reliable indicator of future returns.

Historical backtesting produced the following results:

- An equivalent Bond would have successfully matured early or after 5 years and "Kicked Out" with a gain for investors 86.5% of the time.
- The bond would have produced an average return of 11.03%.
- Investors would have received 100% of capital back and no return 13.5% of the time.
- The bond would not have incurred any losses over the entire 28 years of data tested.
- The average investment term was 1.78 years.

Data Source: Bloomberg & The Goldman Sachs Group, Inc., Delaware, USA 6th December 2018.

WARNING: These figures are estimates only. Simulated past performance is not a reliable guide to future performance.

Key features - how does this Bond work?

Automatic Early Redemption: This 5 year Bond may mature after any of the 9 Semi-Annual Valuation Dates (including the Final Valuation Date) which occur every 6 months from years 1 to 5. If on any one of the Semi-Annual Valuation Dates the closing price level of each of the 4 Stocks is equal to or above the 90% Kick Out Levels recorded on the Initial Valuation Date (8th March 2019), the Bond will automatically redeem and you will receive 100% of your initial investment back plus a return equivalent to 10% per annum (not compounded) as detailed in the table below. If the price level of any one of the 4 Stocks is below its Kick Out Level, the Bond will continue on to the next Semi-Annual Valuation Date.

Maturity in 5 Years:

- If the Bond has not automatically redeemed early and continues for 5 years to the Final Valuation Date (8th March 2024) and the closing price level of each of the 4 Stocks is equal to or higher than its 90% Kick Out Level (90% of the Initial Level) investors receive back 100% of their initial investment plus a 50% gross return.
- If on the Final Valuation Date (that single day only) the Final Price Level of the least performing stock is below the 90% Kick Out Level (90% of the Initial Level)), but is above the 50% Protection Barrier Level then investors will receive back 100% of their initial investment only and will receive no investment return.
- If on the Final Valuation Date (that single day only) the least performing stock is below the 90% Kick Out Level, but at least one of the stocks is above its Initial Price Level, then investors will receive back 100% of their initial investment irrespective of the performance of the other 3 stocks (Additional Protection Feature) and will receive no investment return.
- If on the Final Valuation Date (that single day only) the Final Price Level of the least performing stock is below the 50% Protection Barrier Level (and no stock is above its Initial level) then investors' capital will be reduced by the full amount the least performing stock has fallen from the Initial Price Level to the Final Price Level. Investors' capital is at risk of total loss.

Key Dates and Price levels

- Initial Price Level: The price level of each of the 4 Stocks is recorded on the 8th March 2019 (closing prices).
- Final Price Level: The final price level of each of the 4 Stocks is recorded on the 8th March 2024 (closing prices).
- 50% Protection Barrier Level: 50% of the Initial Price Level of each of the 4 Stocks (closing prices) on the 8th March 2019.

What do the credit rating letters mean?

A credit rating is an evaluation of the credit worthiness of a debtor. The evaluation is made by a credit rating agency of the debtor's ability to pay back the debt and the likelihood of default. The credit rating represents the credit rating agency's evaluation of qualitative and quantitative information for a company or government; including information obtained by the credit rating agencies' analysts.

Credit ratings are used by bond buyers to determine the likelihood that the issuer will repay its bond obligations. Each credit ratings agency uses its own individual rating methodology for measuring creditworthiness. Credit ratings can be subject to changes along with changes in the economy, business environment or on issues affecting a specific firm, industry or country.

The table below defines what the credit ratings from each agency actually mean.

WARNING: If Goldman, Sachs & Co. Wertpapier GmbH, Frankfurt, Germany and The Goldman Sachs Group, Inc., Delaware, USA were to default, you will lose some or all of your investment.

What risks should be considered before investing?

Counterparty risk on Goldman, Sachs & Co. Wertpapier GmbH, Frankfurt, Germany as the Issuer and The Goldman Sachs Group, Inc., Delaware, USA as Guarantor of the Senior Bonds:

By investing in the Bonds you take a credit risk to Goldman, Sachs & Co. Wertpapier GmbH, Frankfurt, Germany and The Goldman Sachs Group, Inc., Delaware, USA, Goldman, Sachs & Co. Wertpapier GmbH, Frankfurt, Germany in its capacity as Issuer and The Goldman Sachs Group, Inc., Delaware, USA as Guarantor. In the case of a default by Goldman, Sachs & Co. Wertpapier GmbH, Frankfurt, Germany or The Goldman Sachs Group, Inc., Delaware, USA, investors have a senior claim to The Goldman Sachs Group, Inc., Delaware, USA on the residual amount (if any) up to the nominal value of the Bond. Senior Debt is borrowed money that a company must repay first if it goes out of business. Senior Debt holders are most likely to be repaid, followed by junior debt holders, preferred stock holders and common stock holders.

Return of capital at Final Maturity Date:

- 100% of investors' capital is returned at the Final Maturity Date of 8th March 2024 if none of the 4 Stocks have fallen by more than 50% from their Initial Price Level, on the Final Valuation Date. An additional protection feature also applies, whereby if any of the 4 stocks are above the Initial Price Level on the Final Valuation Date, 100% of the capital is returned. Otherwise investors' capital will be reduced by the negative performance of the least performing stock, thus the product could potentially incur a total capital loss. (please see examples of illustrative returns on page 10 & 11).

WARNING: Your capital is at risk; you may lose some or all of the money you invest.

Market risks:

- Equity and financial markets are speculative in nature and future prices may trade lower than current prices. A U.S., European or global economic recession may result in stock or financial markets weakening significantly. Global geo-political or climatic events can cause a disruption to markets. Corporate earnings could fall, dividend levels could decrease. When stocks pay out dividends (or go ex dividend) they will usually fall by the amount of the dividend. Credit Ratings may change. Economic policies, taxation policy, interest rates, currency exchange rates, or tax rates may change.
- Inflation may occur over the duration of your Investment and if the returns on your Investment are lower than the rate of inflation this will reduce what you could buy in the future.
- Investors may not receive any investment return so this investment may result in an opportunity cost where other assets generate a higher return on investment.
- The Bond is subject to a maximum growth potential of 10% p.a. (or 5% for each semester elapsed). The Bond tracks the performance of the 4 Stocks but does not invest directly in the shares. As such, the returns could be lower than if you invested directly in the 4 stocks.
- This Bond may be subject to significant price movement at any time before maturity, which may in certain cases lead to the loss of your entire capital invested, if you redeem before maturity.

WARNING: If any of the 4 Stocks is below 50% of its Initial Price Level on the Final Valuation Date and if no stock is above its Initial Price Level, you will lose 50% or more of your initial investment.

Volatility risk:

- Stocks and equity markets can be particularly volatile and can be influenced by global economic growth, geo political risks, wars, economic sanctions, currency exchange rate movements, consumption patterns, technological developments, interest rates, market disruptions and also speculative trading.

Liquidity risk:

- Goldman Sachs International, London, GB aims to provide a secondary market for the Bond during the investment term. However, certain exceptional market circumstances may have a negative effect on the liquidity of the Bond, and even render the Bond entirely illiquid, which may make it impossible to sell the Bond before the Final Maturity Date and result in the partial or total loss of your initial capital invested. It is envisaged that investors will hold the Bond for the full 5 year term and all investors should consider the term before investing.
- Goldman Sachs International, London, GB will be the sole provider of a secondary market for the Bond. There is no other liquid market on which this Bond can be easily traded and this may have a material adverse effect on the price at which the Bond may be sold. As a consequence, you may lose part or all of your initial capital invested if you redeem the investment early. In extremely volatile market conditions encashments may not be possible.

WARNING: If you invest in this product you may not have access to your money for 5 years.

No recourse to any compensation scheme (or similar):

- In the event of a default of Goldman, Sachs & Co. Wertpapier GmbH, Frankfurt, Germany and Goldman Sachs International, London, GB your investment will not be covered by any Compensation Schemes.

Risk of product withdrawal:

- If the volume of funds raised for the Bond is insufficient to proceed, or exceeds any pre hedged amounts, or in the event of extreme market volatility, Cantor Fitzgerald Ireland Ltd., at its sole discretion and without notice, may withdraw the product, or cease to accept applications for it.

Hedging risk:

- After the receipt of a completed application form or an instruction to invest in the Bond, any investor or potential investor who then subsequently decides not to proceed with, or to withdraw from the investment for any reason whatsoever, either before or after the Issue date of 15th March 2019, may then be entirely liable for any hedging costs, breakage costs or bid offer spreads which were incurred by Cantor Fitzgerald Ireland Ltd. in unwinding the position for the investor.

Risk regarding deductions during the life of the Bond:

- Deductions for charges and expenses are not made uniformly throughout the life of the Bond, but are loaded disproportionately onto the early period. If an investor sells the Bond prior to the end of the 5 Year term, the practice of front-end loading will impact on the amount of money that the investor receives. The investor may not get back the full amount they invested.

Early Redemption Risk:

- Prior to Maturity, the value of the Bond may be lower than the original investment amount. As a consequence, the investor may lose part or the entire invested amount if the Bond is sold before the Final Maturity Date.

WARNING: If you cash in your investment before the Final Maturity Date you may lose some or all of the money you invest.

Prospectus and KID Documents:

Investors should refer to the KID (Key Information Document), the Prospectus and final terms associated to this Bond before making any investment in the product. The KID document is available at <https://cantorfitzgerald.ie/private-clients/structured-investments/>.

It is also recommended that investors read carefully the "risk factors" section of the Issuers prospectus and final terms associated to this Bond before making any investment in the product. The prospectus is available the website of the Luxembourg Stock Exchange at <http://www.bourse.lu> and/or could be obtained free of charge from The Goldman Sachs Group, Inc., Delaware, USA at the internet link stated in this document or from Cantor Fitzgerald Ireland Ltd., upon request.

WARNING: The value of your investment can go down as well as up.

4. **Your Investment:** Your investment will be initially lodged to your account with Cantor Fitzgerald Ireland and your funds will be held by our custodian “Pershing Securities International” a subsidiary company of the Bank of New York Mellon (Credit ratings AA2 / AA- / AA). Before the Issue Date Funds will be transferred to Goldman, Sachs & Co. Wertpapier GmbH, Frankfurt, Germany and will be held by Goldman, Sachs & Co. Wertpapier GmbH, Frankfurt, Germany until the Final Maturity Date, The Goldman Sachs Group, Inc., Delaware, USA will provide a financial derivative to provide the investment return. At the maturity date funds will be transferred back to your account in Cantor Fitzgerald Ireland Ltd. and will be held in custody for investors by Pershing Securities International. We will advise you of the amount of funds received and request your instructions at that time. For further information please see our Client Assets Key Information Document.
5. **Returns:**

Automatic Early Redemption Event: An Automatic Early Redemption Event is deemed to have occurred, as determined by the Calculation Agent, if, on any of the Semi Annual Valuation Dates from year 1 in the table below, all of the 4 Stocks close at or above the 90% Kick Out Level as per the table below. The relevant Kick Out % Return in the table below shall be payable, together with the original capital amount invested and the Bond shall mature at that time, no further returns will be payable. Returns are expected to be paid gross of CGT (please refer to taxation section).

Semi-annual Valuation Dates	Potential Redemption Dates	Kick Out Levels	Potential Kick Out % Return If Maturing*
8th March 2020	15th March 2020	90% of the Initial Price Level	10%
8th September 2020	15th September 2020	90% of the Initial Price Level	15%
8th March 2021	15th March 2021	90% of the Initial Price Level	20%
8th September 2021	15th September 2021	90% of the Initial Price Level	25%
8th March 2022	15th March 2022	90% of the Initial Price Level	30%
8th September 2022	15th September 2022	90% of the Initial Price Level	35%
8th March 2023	15th March 2023	90% of the Initial Price Level	40%
8th September 2023	15th September 2023	90% of the Initial Price Level	45%
8th March 2024	15th March 2024	90% of the Initial Price Level	50%

*Potential returns are for illustrative purposes only.

Final Redemption Amount:

Scenario 1: If, on the Final Valuation Date in the table below, all of the 4 Stocks close at or above 90% of their Initial Price Levels, then a Final Redemption Event will have occurred and the Redemption

Amount in the table below shall be payable, together with the original capital amount invested and the Bond shall mature at that time, no further returns will be payable.

Final Valuation Date 8th March 2024	Potential Kick Out % Return If Maturing	Potential % Capital Return If Maturing*
If least performing stock is equal to or above the 90% Kick Out Level	50%	100%

*Potential returns are for illustrative purposes only.

Scenario 2 (If a Knock-In Event has not occurred): If the Bond has not had an Automatic Early Redemption Event before the Final Valuation Date, and if the least performing of the 4 Stocks is below 90% of its Initial Price Level and equal to or above 50% of its Initial Price Level, then investors will receive 100% of the original Capital invested and no investment return will be payable.

Investment Amount x 100%

Scenario 3 (If the Additional Protection Feature applies): If the Bond has not had an Automatic Early Redemption Event before the Final Valuation Date, and if the least performing of the 4 Stocks is below 50% of its Initial Price Level on the Final Valuation Date, but 1 or more of the 4 Stocks is greater than its Initial Price Level, then investors' will receive 100% of the original Capital invested and no investment return will be payable.

Investment Amount x 100%

Scenario 4 (If a Knock-In Event has occurred): If the Bond has not had an Automatic Early Redemption Event before the Final Valuation Date, and if the least performing of the 4 Stocks is below 50% of its Initial Price Level on the Final Valuation Date, and none of the 4 Stocks is above its Initial Price Level, then investors' capital will be reduced by the full amount the least performing stock has fallen from the Initial Price Level to the Final Price level, and no investment return will be payable.

Investment Amount X (Final Price Level / Initial Price Level)

Where:

- Final Price Level = least performing stock closing price level on 8th March 2024.
- Initial Price Level = least performing stock closing price level on 8th March 2019.

The Official Closing Level of the 4 Stocks on the relevant exchanges below will be used in all cases.

Company	Exchange
Royal Dutch Shell PLC (RDSA NA)	Euronext Amsterdam
Exxon Mobil Corp (XOM UN)	NYSE
BP PLC (BP/ LN)	LSE
TOTAL SA (FP FP)	Euronext Paris

If any date mentioned in this Clause 5 does not fall on a day on which banks are open for business in London and Dublin, unless otherwise stated, the next day on which they are open will be used in its place. The Investment Return earned on the Bond will be dependent on fluctuations in financial markets that are outside Goldman Sachs International, London, GB, and Cantor Fitzgerald Ireland Ltd.'s control.

WARNING: These figures are examples only and are not a reliable guide to future performance. The value of your investment may go down as well as up.

WARNING: You may get back less than you invest.

This investment is in the form of a Senior Bond issued by Goldman, Sachs & Co. Wertpapier GmbH, Frankfurt, Germany and the Guarantor is The Goldman Sachs Group, Inc., Delaware, USA. If Goldman, Sachs & Co. Wertpapier GmbH, Frankfurt, Germany and The Goldman Sachs Group, Inc., Delaware, USA, defaults on their obligations you will lose some or even all of the capital invested and any investment return. The Investment Return is provided from the pay-out of financial derivatives provided by The Goldman Sachs Group, Inc., Delaware, USA before the Start Date. Any return is conditional on the fulfilment of the Counterparty's obligations. In certain, albeit unexpected circumstances, the Counterparty may terminate or default on the derivative contract before its natural expiry. If this were to happen, the return on the investment to such termination will be calculated using best market practice and no return will be earned on the Bond. In the event that the Counterparty does not meet its obligations, or if Goldman, Sachs & Co. Wertpapier GmbH, Frankfurt, Germany and The Goldman Sachs Group, Inc., Delaware, USA, were to default, Cantor Fitzgerald Ireland Ltd. will not be liable for any special, incidental, punitive, indirect or consequential damages or losses of any kind incurred by you arising out of or in connection with the Bond.

6. Withdrawals

Your investment in the Cantor Fitzgerald Ireland Oil & Gas Kick Out Bond IV may be held for the maximum 5 Year Term. If you need to cash in your investment early, we will endeavour to facilitate your request.

However we cannot guarantee what its value will be at that point and it may be less than you originally invested. We will pay you the value of your investment in accordance with the prevailing market rate at that time, less any associated selling costs. Cantor Fitzgerald Ireland Ltd. may impose a fee of up to 1% to process early encashments. We would need to receive an instruction from you in writing to process the early encashment of your investment. In the case of joint accounts, instructions from all parties will be required. No withdrawals may be made without Cantor Fitzgerald Ireland Ltd. and or Goldman Sachs International, London, GB's consent prior to the Final Maturity Date. Such consent will be given entirely at Cantor Fitzgerald Ireland Ltd. and Goldman Sachs International, London, GB's discretion. Any Final Return on the Bond will depend on the performance of the 4 Stocks. If you do require access to your Investment before the Final Maturity Date, you will only receive the then present value of your Investment less any applicable fees, which may be less than the original investment.

7. Disclaimer

Reference within the Underlying Investment Strategy to particular assets, stocks or indices are included only to indicate the basis upon which the Investment Return is calculated, not to indicate any association between Cantor Fitzgerald Ireland Ltd. or the Issuer and the relevant asset or the relevant index provider, nor does such reference indicate any endorsement of the investment by the relevant provider. The Bond is not in any way sponsored, sold or promoted by any stock market, index, exchange or, index sponsor, and they make no warranty or representation whatsoever, express or implied, either as to the results to be obtained from the use of such stock market and/or the figure at which the stock market, index or exchange stands at any particular time on any particular day or otherwise. They shall not be liable (whether in negligence or otherwise) to you for any error in the relevant stock market, relevant index or related exchange and shall not be under any obligation to advise any person of any error therein. This document has been prepared in order to assist investors to make their own investment decisions and is not intended to and does not constitute personal recommendations. Specifically the information contained in this report should not be taken as an offer or solicitation of investment advice. Not all investments are necessarily suitable for all investors and Cantor Fitzgerald Ireland Ltd.

recommend that specific advice should always be sought prior to investment, based on the particular circumstances of the investor.

8. Tax

Your Investment in The Bond is held in the form of a Senior Bond issued by Goldman, Sachs & Co. Wertpapier GmbH, Frankfurt, Germany. Based on our understanding of rates of tax, current legislation, regulations and practice, we expect the final bonus returns from this Bond may be subject to Capital Gains Tax (CGT) and returns will be paid to investors gross of CGT, currently the rate of CGT is 33%. Tax rates and legislation could change in the future and may be applied retrospectively. This is a general guide only. It is important that you consult your tax advisers concerning possible taxation and other consequences of making an investment in the Bond. Cantor Fitzgerald Ireland Ltd. are not tax advisors and are not offering any tax advice on this product. Any gains made from the investment by non-taxable investors may be free of tax. The taxation of any gains on investments in the Bond made by companies, partnerships or other businesses will depend on the tax position of the organisation. If you are unsure of your tax status or require further information, please contact your local tax office and/or refer to the Revenue Commissioners website, www.revenue.ie. Cantor Fitzgerald Ireland Ltd. does not provide tax advice. Independent tax advice should be sought by each investor.

WARNING: This is based on our understanding of current tax law and practice which is subject to change without notice in both Ireland and the UK. This information represents our understanding of the taxation treatment of the Bond but does not constitute tax advice and investors should not place any reliance on the content herein. Investors should satisfy themselves independently of the taxation treatment of the Bond, in relation to Revenue reporting requirements and implications for nondisclosure in their own personal circumstances.

9. Maturity

If the Bond has not previously matured early the proceeds of your investment will be paid shortly after The Final Maturity Date. Cantor Fitzgerald Ireland Ltd., and/or your advisor will endeavor to contact you at least 30 days prior to the Final Maturity Date of the Investment. On the applicable Payment Date, or the Maturity Date, funds representing the appropriate return of your capital, together with any Investment Return due, will be transferred back to your account in Cantor Fitzgerald Ireland Ltd. and will be held in custody for investors by Pershing Securities International, a subsidiary company of the Bank of New York Mellon (Credit ratings AA2/AA-/AA), in an individual account in your name. We will advise you of the amount of funds received and request your instructions at that time.

10. Variation

Cantor Fitzgerald Ireland Ltd. reserves the right to amend these Terms and Conditions, subject to the written consent of the Issuer, during the 5 Year Term of the Bond if there is a material, legal, tax or regulatory change affecting these Terms and Conditions. Cantor Fitzgerald Ireland Ltd. and/or your financial advisor will notify you of any changes at least 30 days in advance of changes taking effect.

11. Fees

Cantor Fitzgerald Ireland Ltd. receives a fee for distributing the Bond. Where your investment was made through an authorised financial advisor they also receive a fee for distributing this Bond, these fees are reflected in the terms of the investment. The account fee for custodian services are set in the questions & answers part of this brochure. Please see page 18 for further details on fees.

12. Confidentiality

Cantor Fitzgerald Ireland Ltd. and the Issuer observe a duty of confidentiality about your financial affairs. Neither Cantor Fitzgerald Ireland Ltd. nor the Issuer will disclose details of your investment or your name and address to anyone else, other than to any confidentially appointed agents acting on their behalf or where:

- They are permitted or compelled by law to do so.
- Disclosure is made at your request and with your consent.
- There is a duty to the public to disclose.
- Their legitimate interests require disclosure.

13. Adjustment Events

Should any Market Disruption Event, Change in Law or a Hedging Disruption Event (each an 'Adjustment Event') occur during the 5 Year Term, Cantor Fitzgerald Ireland Ltd. shall be entitled, after consultation with the Issuer and at its absolute discretion, (i) to change the underlying Index or stocks; (ii) to unwind the Bond at the then current market value; (iii) to suspend operations of the Bond during any period in which such event continues and thereafter until the end of the Term; (iv) to adjust any relevant terms of the Bond to preserve the economic equivalent of your investment prior to the occurrence of such Adjustment Event; or (v) to adjust the values used in the calculation of the Investment Return as it deems appropriate, having regard to the Adjustment Event in question. As a result of any such Adjustment Event, the Investment Return (if any) may be lower. In the event of a suspension of the Bond, the issuer shall arrange for the investment accrued to be held on terms to be agreed between Cantor Fitzgerald Ireland Ltd. and the Issuer at their absolute discretion. Cantor Fitzgerald Ireland Ltd. will notify the investors of the occurrence of any such event in such manner as Cantor Fitzgerald Ireland Ltd. deem appropriate. Neither Cantor Fitzgerald Ireland Ltd., the Issuer, nor their agent(s) shall be liable for any loss howsoever suffered by the investor if there is any total or partial failure of performance resulting from any such Adjustment Event or any other causes beyond the control of Cantor Fitzgerald Ireland Ltd., the Issuer or their agent(s).

Events affecting the underlying instrument(s) or hedging transactions: In order to take into account the consequences of certain events affecting the underlying instrument(s) on the product or hedging transactions, the issuers prospectus documentation provides for (a) mechanisms to adjust or substitute underlying instrument(s), (b) the deduction of the increased cost of hedging from any due amount, (c) monetization and accordingly, de-indexation of the pay-off formula for all or part of the amounts payable under the product from the underlying instrument(s), and (d) the early redemption of the product. Any of these measures may result in losses on the product.

14. Information

These Terms & Conditions represent the terms of the contract between you and Cantor Fitzgerald Ireland Ltd. You acknowledge that your application is made on the basis of and is subject to, these Terms & Conditions and the attached brochure and that you have not relied on any representations or other information (whether oral or written) other than as set forth herein. All information that is supplied to you and all communications with you will be in English. The information contained in this brochure is correct at the date sent to you.

15. Jurisdiction

The Terms and Conditions shall be governed by and construed in accordance with the laws of Ireland and the Courts of Ireland shall have exclusive jurisdiction to resolve any disputes in connection with these Terms and Conditions.

16. Unforeseen Events

(a) Cantor Fitzgerald Ireland Ltd. reserves the right not to proceed, for whatever reason, with this Bond and to refund your investment.

(b) Neither Cantor Fitzgerald Ireland Ltd. nor the Issuer nor its agent(s) will be liable for any loss you may suffer if either party or its agent(s) is prevented from providing services to you as a result of industrial action or other cause beyond the reasonable control of either party or its agent(s).

17. Hedging:

If the volume of funds raised for the Bond is insufficient to proceed, or exceeds any pre hedged amounts, or in the event of extreme market volatility, Cantor Fitzgerald Ireland Ltd., at its sole discretion and without notice, may withdraw the product, or cease to accept applications for it. After the receipt of a completed application form or an instruction to invest in the Bond, any investor or potential investor who then subsequently decides not to proceed with, or to withdraw from the investment for any reason whatsoever, either before or after the Issue date, may then be entirely liable for any hedging costs, breakage costs or bid offer spreads which were incurred by Cantor Fitzgerald Ireland Ltd. in unwinding the position for the investor.

Investors should read the Risk Factors in the base prospectus in respect of the Issuer's Series M Prospectus (the "Base Prospectus") and the terms and conditions of the Bonds as set out in the Base Prospectus. You can obtain a copy of the Base Prospectus relating to the securities and any further information about the investment product on request from Cantor Fitzgerald Ireland Ltd. You will also be able to access the base prospectus on the website of the Luxembourg Stock Exchange at <http://www.bourse.lu>
