Green Effects Fund FACTSHEET JUNE 2020

Fund Objectives

The objective of the fund is to achieve long term capital growth through a basket of ethically screened stocks. The fund invests in a wide range of companies with a commitment to either supporting the environment or demonstrating a strong corporate responsibility ethos. Sectors such as wind energy, recycling, waste management, forestry and water-related businesses all feature prominently within the fund. The fund can only invest in the constituents of the Natural Stock Index (NAI) which was set up in 1994 and currently consists of 30 global equities.

Sector Exposure Compared to a Traditional Global Equity Fund

The fund does not invest in banks, oils, mining, metals or large cap technology stocks. From a performance and relative returns perspective this is something that all investors should bear in mind when considering investing in the fund. The overriding investment theme from a sectoral perspective remains that of alternative energy, water, waste management and similar companies with a strong corporate social responsibility (CSR) focus in both their culture and work practices.

Fund Manager Comment

The Green Effects Fund NAV price ended May at €256.10 which was a gain of +8% on the month, bringing the year to date return to +7.5% and its 1year return to +25.3% (all returns net of fees). During the month we added exposure to UK home retail group Kingfisher (joining the FTSE100 index effective 20th June) and Aspen Pharmaceuticals. Separately the exposure to some of the Japanese holdings within the fund (Kurita Water, Ricoh, Shimano) was increased by a combined 1.50% on valuation and earnings. In terms of the main contributors to the fund price move for the month the leaders were Vestas (+1.25%), Kingfisher (+0.85%), Shimano (+0.78%) and Tesla (+0.36%). Last week there was some notable news in Europe which we feel was quite relevant for the Fund and its longer-term prospects. On May 27th, the European Commission outlined its much awaited €750bn Recovery Plan which has placed 'Green' initiatives (energy efficiency, renewables, clean hydrogen, electromobility etc.) at the heart of recovery measures. The EU Commission states that with the support of investments from the recovery plan, the European Green Deal will become a job-creating engine, adding 1% of GDP and creating almost 1 million new green jobs in meeting current 2030 Climate targets. Vestas Wind Systems is one of the largest holdings in the Fund (9%) and is likely to be a medium-term winner from these types of initiatives that are clearly focused on renewables. The group are forecast to grow earnings over the next 3 years by 9% per annum. Overall cash levels within the Fund are now running at just over 5% (from 13% in early March).

Performance As of 31/5/2020
