Section I: General

The Fund

This Supplement is issued in connection with the offer of the Merrion Balanced Fund which has two classes of Shares, namely the “Class A Shares” and “Class B Shares”. The Directors of the Company may create new classes of Shares in the Fund from time to time, provided that the creation of any such new class of Shares is notified and cleared in advance to the Central Bank. A separate pool of assets will not be maintained for each class of Shares.

The Fund is denominated in Euro.

Investment Objective

The Merrion Balanced Fund enables investors to invest in a collective capital investment fund operating on the principle of risk-spreading. The investment objective of the Merrion Balanced Fund is to capture a substantial element of the capital growth potential inherent in equity markets while limiting the risk over the long term through investing in an actively managed balanced portfolio diversified across global transferable securities including equities, closed-ended property funds, government and corporate bonds and cash deposits. The split between asset classes will be actively managed according to economic conditions.

Investment Policy

The Fund’s investment objective will be achieved by investing in a changing mix of equities, closed - ended property funds, bonds, each of which is listed or traded on Recognised Markets and cash deposits. Any such bonds will be of Investment Grade and shall include, but are not limited to, floating rate notes, fixed and variable rate securities, government bills and bonds issued by governments of EU Member States or OECD member states, corporations, financial institutions and multi-governmental institutions such as the World Bank and the European Investment Bank. All of the transferable securities to be acquired by the Fund will be listed or traded on Recognised Markets. In addition, the Fund may include in its portfolio cash deposits or other ancillary liquid assets, held in accordance with the Central Bank UCITS Regulations.

The equities to be acquired by the Fund will consist of shares issued by a range of companies operating in different geographical regions (including Europe, North America and Asia) and business sectors (including sectors such as financial, healthcare, consumer discretionary, consumer staples, energy, basic materials, telecommunications, utilities, technology, and industrials). The companies will vary in size in terms of market capitalisation. The Investment Manager will apply prudent diversification criteria to the stock holdings.

The Investment Manager may utilise foreign exchange forwards to hedge and/or gain foreign currency exposure. It is intended that the use of such foreign exchange forwards will reduce the currency risk in respect of the Fund and will better enable the Fund to manage its assets and liabilities.

Foreign exchange forwards are agreements to exchange two designated currencies at a specific time in the future for a pre-determined price. The Investment Manager may invest in foreign exchange forwards to provide (i) protection against exchange rate risks on a Sub-Fund’s assets and liabilities and/or (ii) foreign exchange exposure, in each case subject to the conditions and limitations set out in the Regulations. The Manager has a risk management process in place which enables it to accurately measure, monitor and manage the risks attached to foreign exchange forwards, and details of this process have been provided to, and approved by, the Central Bank in accordance with the Central Bank UCITS Regulations. Investors should note that returns which are derived from derivatives may be more volatile than returns which are derived from the asset underlying the derivatives. Accordingly, investors’ attention is drawn to the risk factors set out in the Prospectus, and in particular, the sections entitled “Currency Risk” and “Derivatives Risk”.

The Manager, in conjunction with the Investment Manager, shall calculate global exposure and potential leverage pursuant to the commitment approach as permitted under the Regulations. The maximum global exposure and potential leverage created by the use of foreign exchange forwards shall not exceed the limit prescribed by the Regulations (i.e. the Fund’s global exposure and leverage must not exceed the Fund’s total net asset value).

Section I: General

Investment Restrictions

The asset allocation of the Merrion Balanced Fund will be actively managed with broad asset ranges determined by the Investment Manager. Under normal circumstances, the Merrion Balanced Fund will not have less than 20% of its net assets invested in cash or government securities other than as a result of market movement. The Fund may invest up to 10% of its Net Asset Value in recently issued equities which will be admitted to official listing on a Recognised Market within one year. In addition, the Fund may invest up to 10% of its Net Asset Value in the equities of unquoted companies.

Dividend Policy

It is currently not intended that the Fund will pay dividends or otherwise make distributions to Shareholders.

Risk Factors

Investors' attention is drawn to the risk factors set out in the Prospectus and to the following additional risk factors.

Shareholders should note that the management fees and expenses incurred by the Fund will as far as possible be deducted from the income of the Fund. If there is insufficient income, the balance will be charged to the capital of the Fund. This may have the effect of lowering the capital value of the Shareholder's investment.

Taxation

Any change in the Fund's tax status or in taxation legislation could affect the value of the investments held by the Fund and could affect the return to investors. Potential investors and Shareholders should note that the statements on taxation, which are set out herein are based on advice which has been received by the Directors regarding the law and practice in force in the relevant jurisdiction as at the date of this Supplement and the Prospectus. As is the case with any investment, there can be no guarantee that the tax position or proposed tax position prevailing at the time an investment is made in the Fund will endure indefinitely. The attention of potential investors is drawn to the tax risk associated with investing in the Fund. See section headed "Taxation" on page 31 in the Prospectus.

Investment Management and Distribution Fees

Investors' attention is drawn to the Fees and Expenses Section in the Prospectus and in Sections II and III of this Supplement.

Establishment Expenses

The expenses incurred in connection with the establishment of the Company are as set out in the section headed Fees and Expenses in the Prospectus and have been equally apportioned between the Initial Funds. Any Funds of the Company which may be established at a later date may, at the absolute discretion of the Directors, be allocated such portion of the formation expenses of the Company as the Directors consider to be fair in the circumstances.

Compulsory Redemptions

The Directors may compulsorily redeem or transfer any holding of Shares in certain circumstances. See section headed "Compulsory Redemptions" on page 21 of the Prospectus.
