Management fees are detailed in the relevant share class addendum. The Merrion Multi-Asset (MMA) funds were launched in July 2015, therefore they do not have an established long-term actual past performance record prior to that date. The information includes simulated performance for the MMA funds based on the asset allocation of the Merrion Managed Fund, which has been 60-80% in Growth Assets, reweighted on a pro rata basis for the MMA simulated performance. These funds and the Merrion Managed Fund are managed by the same investment team, follow the same investment strategy and use the same investment process. Consequently, we anticipate that the past performance of the Merrion Managed Fund based on the asset allocation methodology is representative of the simulated past performance that may have been achieved by the MMA funds had they been available over the historical periods shown.
