WHAT IS THIS PRODUCT?

Type:

This investment fund is a Undertaking for Collective Investment in Transferable Securities (UCITS)

Term:

This product is not subject to any fixed term and provides daily dealing. The product does not have a maturity date and is not redeemable by the Manufacturer on any specific date.

Objectives:

The Sub-Fund is an actively managed portfolio of broad and diversified range of equities listed on recognised markets, EFTs, and Collective Investment Schemes. The investment objective of the Sub-Fund is to maximise total returns whilst investing in a broadly diversified portfolio of global equities all whilst looking to promote alignment with the goals of the Paris Agreement. The Sub-Fund will seek to achieve its investment objective by building a globally diversified portfolio of equities and Collective Investment Schemes that are Quality Investments (financially robust, with high returns on capital, strong profit growth and good corporate governance) that are aligned with the goals of the Paris Agreement. The Sub-Fund's return will be determined by the performance of the underlying holdings of equities and Collective Investment Schemes.

The Fund promotes environmental characteristics, including a reduction of carbon emissions and climate change mitigation, by investing in companies the Sub-Investment Manager believes demonstrate a realistic pathway to achieve 'net zero' greenhouse gas (GHG) emissions before 2050, consistent with the Paris Agreement. Equities must also follow good governance practices in accordance with Article 8 of SFDR. The Fund does not have sustainable investment as its investment objective.

The Sub-Fund shares do not pay you income, instead the Fund reinvests income to grow your capital. Shares can be redeemed on a daily basis.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity of the fund to pay you.
