The Central Bank of Ireland („CBI“) is responsible for the supervision in relation to the key information document.

Green Effects NAI-Werte Fonds („Fund“) is an approved sub-fund of the Company which is authorised in Ireland.

Bridge Fund Management Limited, the UCITS Manager of the Fund, is authorised in Ireland and regulated by the Central Bank of Ireland.

This document is dated 01 July 2023

## What is this product?

### Type:

The Fund is an approved fund of the Company which is authorised as a UCITS by the Central Bank of Ireland.

### Term:

This Fund has no maturity date and is not subject to any fixed term. Green Effects Investment plc may not terminate the Fund unilaterally. Further information on the termination provisions relating to the Fund is available in the Company's Prospectus and constitutional documents.

### Objective

#### The Investment Objective:

The Investment Objective of the fund is to achieve long term capital growth by investing in ethically and ecologically orientated and socially sustainable equity securities. To this end, the Fund will invest exclusively in shares included in the Natur-Aktien-Index (NAI) („NAI companies“)

#### The Investment Policy:

The Fund is actively managed, whereby the investment manager does not replicate the NAI but uses it exclusively as a source of ethically, environmentally and socially sustainable shares; the NAI is therefore the Fund's benchmark. Article 9 of Regulation (EU) 2019/2088 and Article 5 of Regulation (EU) 2020/852 (EU Taxonomy Regulation) apply to the Fund. The investment in the NAI companies has the potential to contribute to the following environmental objectives set out in Article 9 of the Taxonomy Regulation: a) climate change mitigation; b) climate change adaptation. For example, the NAI Companies may offer products or services related to (i) energy-efficient, environmentally sound heat supply, propulsion and transportation systems based on wind, sunlight, water,

biomass or other renewable energy sources, (ii) involve the construction of thermally efficient buildings made of ecologically sound building materials; or (iii) are manufactured with minimal energy consumption. In addition, investments in NAI companies are expected to have the potential to contribute to the other environmental objectives listed in Article 9 of the Taxonomy Regulation: c) the sustainable use and protection of water and marine resources, d) the transition to a circular economy, e) pollution prevention and control, f) the protection and restoration of biodiversity and ecosystems.

#### Intended Investor:

The Fund is primarily aimed at socially, ethically and ecologically oriented private investors who pursue the goal of asset formation or asset optimization and want to invest for the long term. Investors should have basic knowledge and/or experience with financial products and be able to assess the risks and value of the investment. The investor must be willing and able to accept substantial fluctuations in the value of the units and, if necessary, a substantial loss of capital.

**Dealing Frequency:** Investors may buy or sell Shares in the Fund by submitting an application on any Irish banking day before 4:00 p.m. (Dublin time) or 5:00 p.m. (Hamburg time) or 5:00 p.m. (Hamburg time). The latest prices of units can be found at [www.fundinfo.com](http://www.fundinfo.com).

#### Depositary:

Northern Trust Fiduciary (Ireland) Limited

#### Further information:

Please notice the section "Other relevant information" at the end of this document

## What are the risks and what could I get in return?

### Risk Indicator:

The risk indicator assumes you keep the product for 5 years.

**The actual risk can vary significantly if you cash in at an early stage and you might get back less.**

The overall risk indicator helps you to assess the risk associated with this product compared to other products. It shows how likely it is that you will lose money on this product because the markets develop in a certain way or because we are unable to pay you.

We have classified this product as risk class 4 on a scale of 1 to 7, which corresponds to a medium risk class. The risk of potential losses from future performance is classified as medium. In the event of poor market conditions, it is possible that our ability to pay you could be impaired. This product does not include protection against future market developments, so you could lose some or all of the capital you invested. Other risks relevant to the product that are not included in the overall risk indicator, please refer to the Annual Report or the Prospectus of the product.

## Performance Scenarios:

The figures shown include all the costs of the product itself but may not include all the costs you have to pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances.

Recommended holding period:		5 years	
Example Investment:		€ 10.000	
Scenarios		If you exit after 1 year	If you exit after 5 years
<b>Minimum</b>	There is no minimum guaranteed return if you exit before 5 years. You could lose some or all of your investment.		
<b>Stress</b>	What you might get back after costs	€ 2.067	€ 2.091
	Average return each year	-79,32 %	-26,87 %
<b>Unfavourable</b>	What you might get back after costs	€ 7.704	€ 8.213
	Average return each year	-22,96 %	-3,86 %
<b>Moderate</b>	What you might get back after costs	€ 10.512	€ 15.999
	Average return each year	5,12 %	9,86 %
<b>Favourable</b>	What you might get back after costs	€ 16.758	€ 21.237
	Average return each year	67,58 %	16,26 %

## What happens if Green Effects Investment plc is unable to pay out?

The assets of the Fund are held separately with the depositary, Northern Trust Fiduciary Services (Ireland) Limited. If Green Effects Investment plc experiences financial difficulties, these assets will not be affected. Should the Fund default, the Depositary would liquidate the investments and distribute the proceeds to investors. If the product records a loss due to the Depositary's failure, you may lose all or a portion of your investments. There is no compensation or guarantee system that protects you from a failure of the product's Depositary.

## What are the costs?

### Costs over time

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have made the following assumption: In the first year, you would get back the amount invested (0% annual return). For the other holding periods we have assumed, that the product develops as shown in the middle scenario. € 10,000 is invested.

	If you exit after 1 year	If you exit after 5 years
<b>Total costs</b>	€ 519	€ 1.187
<b>Annual cost impact (*)</b>	5.2 %	2.1 % each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 11.9% before costs and 9.8% after costs.

### Composition of costs

The amounts shown here illustrate what costs are incurred and how they break down when you invest in the fund. We have made the following assumption: € 10,000 is invested.

One-off costs upon entry or exit		If you exit after 1 year
<b>Entry costs</b>	4.00% of the amount you pay when you enter into this investment. The amount stated is the maximum rate. It may be lower in individual cases. You can find out the actual amount applicable to you from the distributor of the Fund's units.	Up to € 400
<b>Exit costs</b>	We do not charge an exit fee for this product.	€ 0
<b>Ongoing costs taken each year</b>		
Management fees and other administrative or operating costs	The ongoing charges figure is based on expenses for the year ended 30/11/2022. This figure may vary from year to year	€ 110
Transaction costs	0.09% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	€ 9
<b>Incidental costs taken under specific conditions</b>		
Performance fees	There is no Performance Fee for this product	€ 0

## How long should I hold it and can I take money out early?

The Fund is not intended for short-term speculative purposes. The recommended holding period is at least 5 years. The Fund has daily liquidity. In principle, investors may request the Company to redeem units on each trading day. However, the redemption may be temporarily suspended by the Company if circumstances exist that require a suspension and this is justified taking into account the interests of the investors. No costs or fees are incurred for redemptions.

## How can I complain?

As a shareholder in the Fund, you are entitled to make a complaint free of charge. Such complaints must be dealt with promptly and effectively by the Company. In case of a complaint, you may contact Green Effects Investment plc in writing (c/o SECURVITA Finanzdienstleistungen GmbH, Lübeckertordamm 1-3, 20099 Hamburg, Germany) or by e-mail to [beschwerde@greeneffects.de](mailto:beschwerde@greeneffects.de).
