## WHAT IS THIS PRODUCT?

### Type:

The Fund is a sub-fund of Northern Trust Investment Funds PLC, incorporated with limited liability as an open-ended umbrella investment company with variable capital in the form of an undertaking for collective investment in transferable securities (UCITS). Your investment will take the form of shares in the Fund.

### Term:

The Fund has no set termination date. The fund may be terminated at the discretion of the directors of the Manufacturer, provided that a minimum of twenty-one days' written notice has been provided to Shareholders.

### Objectives:

The Fund aims to maximise total returns while maintaining a balanced exposure to dividend yield and dividend growth, subject to relevant prudential considerations with regard to the spread of risk and the credit quality of individual investments. The Fund's investment objective will be achieved by investing in equities (e.g. shares) listed or traded on recognised Markets and collective investment schemes (including ETFs) with investment policies consistent with the Fund's overall investment policy. In addition, the Fund may include in its portfolio cash deposits or other ancillary liquid assets.

### Intended Retail Investor:

This Fund may not be suitable for investors who plan to withdraw their money within 5 years.

## WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

### Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

**We have classified this product as class 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity of the fund to pay you.**

The underlying funds may include illiquid assets such as alternative funds, real estate funds and/or non-quoted assets. These assets incur additional risks which are not considered in the indicator shown above when they do not represent a significant part of the underlying funds. These risks are that these assets could not be sold or not sold at the desired time and / or lead to significant losses. You may not be able to sell your product easily or may have to sell at a price that significantly impacts on how much you get back.

Be aware of currency risk. The underlying funds may receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The value of investments and the income derived therefrom may fall as well as rise and investors may not recoup the original amount invested. Past performance is not a reliable guide to future performance. If you invest in this fund you may lose some or all of the money you invest.
