What Do The Credit Rating Letters Mean?

A credit rating is an evaluation of the credit worthiness of a debtor. The evaluation is made by a credit rating agency of the debtor's ability to pay back the debt and the likelihood of default. The credit rating represents the credit rating agency's evaluation of qualitative and quantitative information for a company or government, including information obtained by the credit rating agencies' analysts.

Credit ratings are used by bond buyers to determine the likelihood that the issuer will repay its bond obligations. Each agency uses its own individual rating methodology for measuring creditworthiness. Credit ratings can be subject to modification due to changes in the economy, business environment or other issues affecting a specific firm, industry or country.

The table below defines what the credit ratings from each agency actually mean.

**Source : Societe Generale KID Document as of 26th November 2024.*

Counterparty risk on the Issuer and Societe Generale:

By investing in the Bond you take a credit risk to the Issuer Societe Generale. In the case of a default by Societe Generale, investors have a senior preferred claim to Societe Generale on the residual amount (if any) up to the nominal value of the Bond. Senior Debt is borrowed money that a company must repay first if it goes out of business. Senior Preferred Debt holders are most likely to be repaid, followed by junior debt holders, preferred stock holders and common stock holders. If a counterparty is unable to fulfil its contractual obligations to return funds to an investor this is known as a default. In the case of a Senior Debt* default by Societe Generale investors would receive the Recovery Value of the Bond. Please also see pages 8-10 for further details on credit risk and the independent credit ratings of Societe Generale.

100% Capital protection:

This Bond provides 100% capital protection, its value is 100% protected by Societe Generale one of Europe's largest banking groups.

Issuer Callability Risk:

- The Bond is also callable on the 4 annual Optional Redemption Dates by the Issuer subject to 2 week's prior notice to Cantor Fitzgerald Ireland Ltd. If the Issuer exercises its right to call, the Bond will redeem with 100% of the capital invested and any interest due. It is likely the Issuer would call the Bond if €STR rates fell below c. 1%. The Bond may be redeemed early by the Issuer, and this could lead to re-investment risk for the investor. The timing of an Issuer "Call" or redemption event may not suit investors.

Market risks:

- This Bonds interest rates and the additional Booster returns in the event of a Call are fixed. Rates may decrease or increase over time.
- Interest rates and financial markets are speculative in nature and can be volatile, future interest rates may trade lower than interest rates prices. A U.S., European or global economic recession may result in interest rates or financial markets weakening significantly. Global pandemics, geo-political tensions, political instability, invasions, war, natural hazards, seismic hazards, climatic events or technological developments can cause a disruption to markets. Bank Earnings earnings could fall. Credit Ratings may change. Economic policies, taxation policy, interest rates, interest rate spreads, currency exchange rates, or tax rates may change.
- Inflation has increased, if it remains high or continues increasing over the duration of your Investment and if the returns on your Investment are lower than the rate of inflation this will reduce your purchasing power and what you could buy in the future.
- This investment may result in an opportunity cost where other assets generate a higher return on investment.

Warning: Inflation may have an impact on the performance / value of your investment and on the nominal returns. The 100% capital protection cannot protect against the effect of inflation over time.

Liquidity risk:

- Societe Generale aims to provide a secondary market for the Bonds during the investment term. However, certain exceptional market circumstances may have a negative effect on the liquidity of the Bond, and even render the Bond entirely illiquid, which may make it impossible to sell the Bond before the Final Maturity Date and result in the partial or total loss of your initial capital invested. It is envisaged that investors will hold the Bond for the full 5 year term and all investors should consider the term before investing. Societe Generale will be the sole provider of a secondary market for the Bonds. There is no other liquid market on which this Bond can be easily traded and this may have a material adverse effect on the price at which the Bond may be sold. As a consequence, you may lose part or all of your initial capital invested if you redeem the investment early. In extremely volatile market conditions encashments may not be possible.

Concentration Risk:

- Your investment in the Bond should only be considered as a part of your overall diversified investment portfolio. You should not put all, nor a large part, of the money you have available for investment into any one investment, or exposed to any one counterparty.

This Bond is Callable:

- The Bond is Callable and may be redeemed early by the Issuer Societe Generale, annually on the 4 Optional Redemption Dates. Interest rates at the time of redemption may be different and rates could be lower than the fixed term rates that are currently available.

No recourse to any Deposit Guarantee Scheme:

- This Investment is not a Deposit. In the event of a default of the Issuer Societe Generale your investment will not be covered by any Deposit Guarantee Scheme.

Risk of Bond withdrawal:

- If the volume of funds raised for the Bond is insufficient to proceed, or exceeds any pre hedged amounts, or in the event of extreme market volatility, Cantor Fitzgerald Ireland Ltd., at its sole discretion and without notice, may withdraw the product, or cease to accept applications for it. Investments may also be scaled back or reduced and refunded, in whole or in part, before the Issue Date at the sole discretion of Cantor Fitzgerald Ireland Ltd.

WARNING: This investment is a complex investment product and may be difficult to understand. Investors should not invest in this product without having sufficient knowledge, experience and professional advice from their Financial Broker to make a meaningful evaluation of the merits and risks of investing in a product of this type, and the information contained in this document and the Base Prospectus.

Hedging Risk:

- After the receipt of a completed application form or an instruction to invest in the Bond, any investor or potential investor who then subsequently decides not to proceed with, or to withdraw from the investment for any reason whatsoever, either before or after the investment date, may then be entirely liable for any hedging costs, breakage costs or bid offer spreads which were incurred by Cantor Fitzgerald Ireland Ltd. in unwinding the position for the investor.

Redemption Risk:

- This Bond could be redeemed early, or "Called" by the Issuer each year on the 4 Optional Redemption Dates on 2 week's notice to Cantor Fitzgerald Ireland Ltd. The Bond is likely to be called if €STR interest rates became negative.

Bail In Risk:

- A bail-in provides relief to a financial institution on the brink of failure by requiring the cancellation of debts owed to creditors and or unsecured depositors.
- In 2014, the member states of the European Union adopted the European Union Bank Recovery and Resolution Directive (BRRD) as a means to protect the financial health of, and the banking services provided by, its banks (called "EEA Financial Institutions"). By January 1, 2016, each European Union member state adopted legislation (collectively, the "Bail-In Legislation") implementing the BRRD, which ultimately gave regulators the power to restructure the liabilities of a distressed bank.

- The BRRD gives certain powers under a “bail-in tool” to national supervisory authorities with respect to certain institutions (which could include the Guarantor) in circumstances where a national supervisory authority has determined that such an institution is likely to fail. The relevant regulation that implemented the BRRD into the Irish legislative system is the European Union (Bank Recovery and Resolution) Regulations (S.I. No 289 of 2015), which came into effect on 15 July 2015 (save for the bail-in tool, which came into effect on 1 January 2016). This bail-in tool includes the ability to cancel all or part of the principal and/or interest of any unsecured liabilities or to convert certain debt claims into equity or other securities of the issuer or another person. These powers could be exercised in respect of the Bond. If the Issuer becomes subject to resolution measures in the form of bail-in, investor’s residual claim on the Issuer may be reduced to zero, converted into equity or its maturity may be postponed. As a result, in the event of a failure of Societe Generale as Issuer the exercise of any resolution power or any suggestion of any such exercise could materially adversely affect the value of the Bond and could lead to the investor losing some or all of the value of the investment in the Bond.

WARNING: Assessments of the economic impact of elevated geopolitical risks including conflicts, tensions between states, economic sanctions and potential sovereign defaults on this investment are not possible at present. These risk factors may negatively impact on the counterparty default risks, valuations & performance of this investment.

An early encashment fee of up to 1% applies where you have encashed prior to the Final Maturity Date.

Overall indicative fee quoted above is correct as at the 6th January 2025. Do I have access to my investment?

It is intended that your investment in the Bond will be held for the full 5 year term (or earlier if the Bond is Called by the Issuer). If you need to cash in your investment early, Societe Generale aims to provide, under normal market conditions, a daily secondary market with a 1% bid / offer spread. Cantor Fitzgerald Ireland Ltd. may impose a fee of up to 1% to process any early encashment of your investment where such early encashment is possible. We would need to receive an instruction from you in writing to process any possible early encashment of your investment. In the case of joint accounts, corporates/ARF's/AMRF's & Trusts instructions from all authorised persons will be required.
