## Executive summary

The Cantor Fitzgerald Ireland Euro Stoxx Banks Index Kick Out Bond (the “Bond” or “Investment”) is a 5 year investment with the potential to redeem early or ‘Kick Out’ every 6 months after year one with a payment equivalent to 8% p.a. (simple interest). This Bond has 9 potential opportunities to be redeemed on any of the Semi-Annual Valuation Dates between the first and fifth anniversary of the Issue Date. Potential payments grow by 4% for every 6 months of the term that has elapsed (8% p.a.) to a maximum of 40% (6.96% CAR) in year 5. If after 5 years at the Final Valuation Date the Bond has not Kicked Out and the Index is more than 40% below its Initial Price Level, investors’ capital will be reduced by the full amount of the negative performance of the Index over the 5 year term. This is a High Risk investment product, with 100% of capital at risk. Investors in this Bond must have good knowledge & experience of similar investments (Structured Products) or the financial markets.

### Kick Out Payments:

Potential payments are linked to the performance of the Euro Stoxx Banks Index (SX7E Index) (The Index).

If the Euro Stoxx Banks Index (SX7E Index) is equal to or above its relevant Step Down Kick Out Barrier Levels on any semi-annual valuation date after year one, the Bond will Kick Out and redeem early with a return of 100% of the original capital invested along with a potential payment.

The potential payments are calculated as 4% for every 6 month period of the term that has elapsed (or 8% per annum) before the bond Kicks Out. If after year one or any subsequent semi-annual period, the Index is below its relevant Step Down Kick Out Barrier levels, no return is paid for that period and the Bond rolls onto the next period and the potential payment increases by an additional 4%. The maximum potential return is 40% (6.96% CAR) if the Bond runs for the full 5 year term and Kicks Out at Maturity. Please see the illustrations on page 4 for more details on the range of potential returns during the term and the potential maturity scenarios.

**The Step Down Kick Out Barrier Level reduces by 2.5% annually from 100% of its Initial Level in year 1, down to 90% in year 5.** This Bond can pay out a return even if the Index falls by up to 10% from its Initial Price Level. The Step Down Kick Out Barrier Levels for this Bond are set at the start of the investment term and fixed for the full investment term (please see page 4 for further details).

**The 60% Protection Barrier:** If the Bond has not kicked out previously, at the end of 5 years (on the Final Valuation Date of 7th March 2030) this Bond returns 100% of investors’ capital if the Index has not fallen by more than 40% its the Initial Price Level.

**Guarantor:** Morgan Stanley, Delaware, USA. one of the largest international financial services groups, and the 100% owner of the Issuer Morgan Stanley B.V. (N.B this is not a capital protected Bond).

**Issuer:** Morgan Stanley B.V., (Netherlands), part of one of the largest international financial services groups.

**Bond Listing:** Luxembourg Stock Exchange (regulated market).

**Lead Distributor:** Cantor Fitzgerald Ireland Ltd. is a Cantor Fitzgerald company, part of the leading global financial services group.

**Target Market:** Please see page 14 for further details of the Identified Target Market. The product is not suitable for all investors and also is only suitable for a certain portion of the investment portfolio of Target Market investors.

**Final Maturity Date:** 14th March 2030 (with potential opportunities to redeem early semi-annually every 6 months after year one).

**Risk:** The Bond is categorised as a High Risk investment (SRI risk level 6 out of 7). If after 5 years at the Final Valuation Date the Bond has not Kicked Out and the Index is more than 40% below its Initial Price Level, investors’ capital will be reduced by the full amount of the negative performance of the Index over the 5 year term (this is known as a Knock In Event). Investors’ entire capital is therefore at risk. Other potential risks include the financial failure of Morgan Stanley (as guarantor). Please note this product is not capital protected. We would like to draw your attention to “What risks should be considered before investing?” on page 12.

**Advice:** This product is being marketed on an advisory basis only. Prior to investing, it is important that you take financial advice from your Financial Advisor or from your Cantor Fitzgerald Ireland Portfolio Manager. ## Investment summary

The Cantor Fitzgerald Ireland Euro Stoxx Banks Index Kick Out Bond (the “Bond” or “Investment”) is a 5 year Investment, which may, subject to certain terms, redeem early. Both the capital invested in the Bond as well as the potential investment returns are linked to the performance of the Euro Stoxx Banks Index (SX7E Index) (The Index). This Bond can pay out a return of 8% p.a. (simple interest) if the Index is equal to or above its relevant Step Down Kick Out Barrier Levels, on the Semi-Annual Valuation Dates. The Step Down Kick Out Barrier Levels are set at the start of the investment term as per in the table below.

After the first year and every 6 months thereafter, should the Index be equal to or above its relevant Step Down Kick Out Barrier Levels set at the start of the investment term, then an early redemption shall occur. Each investor will be repaid 100% of their initial capital plus a potential payment, and the product will terminate early. The Potential Payments are calculated as 4% for every 6 month period that has elapsed (or 8% per annum). If after year one or any subsequent semi-annual period, the Index is below its relevant Step Down Kick Out Barrier Levels, the Bond rolls onto the next period and the Potential Payment grows 4% per semi-annual period for a maximum term of 5 years. The maximum return is 40% (6.96% CAR) if the Bond was to Kick Out at the end of the 5 year term.

At the end of 5 years this Bond returns 100% of investors’ capital provided the Index has not fallen by more than 40% from the Initial Price Level. Otherwise if after 5 years, at the Final Valuation Date, the Index is more than 40% below the Initial Price Level, investors’ capital will be reduced by the full amount of the negative performance of the Index from the Initial Price Level to the Final Price Level (this is known as a Knock In Event). 100% of investors capital is therefore at risk. This is a high risk (SRI risk level 6) investment product. Investors in this Bond must have good knowledge & experience of similar investments (Structured Products) or the financial markets.

## The EURO STOXX BANKS Index (SX7E Index):

The EURO STOXX BANKS Index (SX7E Index) (The Index) is a stock market index that tracks the performance of Euro Zone bank stocks. Specifically, it includes the 27 largest banks in the Eurozone. The Index is often used as a benchmark to gauge the overall performance of the European banking sector. Since the 2007 global financial crisis the stock market has significantly de-rated the banking sector leaving the Euro Zone banking sector at relatively low valuations compared to the broader Eurozone stock market.

The Banking sector in the Euro Zone is heavily discounted vs the Eurozone stock market. As per the chart below the EURO STOXX BANKS Index is currently trading near the levels it was back in 1993, Euro Zone banks average share price performance is now roughly flat over the last 30 years. European Banks are also trading at around 70% of their book values, and at a relatively low price earnings (p/e) ratio of around 6.1 times 2024 earnings estimates on average. Whilst the broader Euro Zone stock market currently trades at over 12.1 times earnings and circa 160% of book value. Historically, European banks have traded at an average 9.4 times consensus forward earnings per share since 2003 but are now trading at just 6.1 times earnings estimates\*. European banks have also traded at around a 26% discount to the broader European equity market, but are now trading at a c. 50% discount to the European equity markets\*. However, the Banking sector can also be highly volatile at times as illustrated in the chart below. Banks face key risks including; credit risk, liquidity risk and market risk arising from fluctuations in interest rates, currencies and asset prices. Additionally, operational risks such as cyberattacks and system failures, along with regulatory and compliance risks can lead to financial losses.

Banks can also offer growth opportunities, as economies expand demand for loans and other financial services typically increases, leading to potential growth in banks' revenue and profitability. Higher interest rates in recent years have also significantly improved bank operating margins. Eurozone banks capital generation continues to be strong and the CET1 capital ratio for Eurozone banks is now around 15.81%\* according to the ECB in the second quarter of 2024 (significantly above the regulatory minimum requirements of 4.5%). If core European banks increasingly return surplus capital via increasing dividends and share buybacks and continue to show resilient earnings, while costs remain under control, we would expect the valuations in the Euro Zone banking sector to improve over future years. The Eurozone banking sectors modest valuations, free cash flow generation plus excess capital may provide some downside protection and rebound potential for the sector in future years. As Illustrated in the chart below, the Eurozone banking sector has lagged the recovery in the broader Eurozone stock markets since 2009, and is still trading close to levels seen in 1993 over c. 30 years ago.

It is important to note that investing in the stock market, including the EURO STOXX BANKS Index (SX7E Index), carries risks. 100% of your capital is at risk as if on the Final Valuation Date the Final Price Level of the Index is more than 40% below its Initial Price Level you will lose more than 40% of your initial investment amount. The value of investments can fluctuate, and past performance is not indicative of future results.

Note: The detailed methodology including the Index calculation formula can be found in the Index rulebook: <http://www.stox.com/indices/rulebooks.html>

**WARNING: Past performance is not a reliable guide to future performance.  
The value of investments may go down as well as up.**

**WARNING: The Index has concentration risk as performance is based on just a few stocks or sectors of the market, rather than widely dispersed across more asset classes, industries and sectors.**

## How would this Bond have performed in the past?

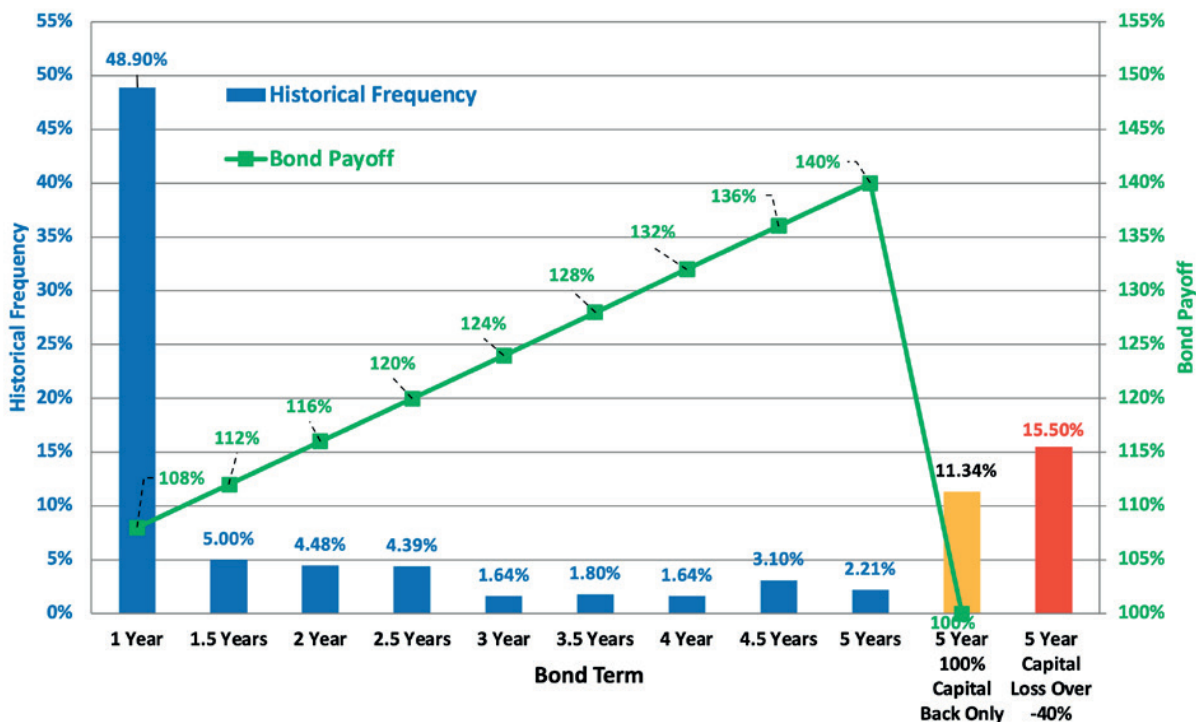

In order to demonstrate how the Bond would have performed had it been purchased in the longer term, a series of tests to determine the Bond's 'Simulated Past Performance' were carried out. The exact parameters of the Bond were applied to over 25 years of historic daily price information, from the 23rd July 1998 to 15th October 2024, which produced 5,485 observable five year rolling periods. This includes several very negative economic periods for European banks, such as the global financial crisis of 2007-2009 and the 2010 European sovereign debt crisis. **It is important to note that this product is based on an Index we currently have a positive long term outlook on. However, we would stress we would not necessarily have held the same view on the Index historically.** We also note past performance is not a reliable indicator of future returns.

Historical backtesting produced the following results:

- An equivalent Bond would have successfully matured early or after 5 years and "Kicked Out" with a gain for investors 73.16% of the time.
- The Bond would have returned at least 100% of the initially invested capital at maturity 84.5% of the time.
- There was a 15.5% historic probability of the Bond incurring a capital loss in excess of -40% (-9.71% CAR) over the period tested.
- The average investment term was 2.53 years.
- Investors would have received, on average, 99.75% of capital back, or an average return since 17th February 1998 of -0.25% (-0.05% CAR).
- The maximum return was 140% (6.96% CAR) (including original capital invested) and the lowest return was 15.51% (-31.12% CAR) of original capital back which would have occurred on an investment made in 2007 before the onset of the global financial crisis.

100% of your capital is at risk. If on the Final Valuation Date the Final Price Level of the Index is more than 40% below its Initial Price Level you will lose more than 40% of your initial investment amount, investors' capital will be reduced by the full amount of the negative performance of the Index over the 5 year term. This is a high risk (SRI risk level 6) investment product.

**% Historic Probability of Kick Out Returns and Capital Losses:**

Data Source: Bloomberg & Morgan Stanley 22/11/2024.

**WARNING: These figures are estimates only. Simulated past performance is not a reliable guide to future performance.**

**WARNING: If on the Final Valuation Date the Final Price Level of the Index is more than 40% below its Initial Price Level, at the Final Valuation Date you will lose more than 40% of your initial investment amount.**

## Key features – how does this Bond work?

**Automatic Early Redemption:** This 5 year Bond may mature after any of the 9 Semi-Annual Valuation Dates (including the Final Valuation Date) which occur semi-annually from years 1 to 5. If on any one of the Semi-Annual Valuation Dates the closing price level of The Index is equal to or above its relevant Step Down Kick Out Barrier Levels on the Initial Valuation Date, the Bond will automatically redeem and you will receive 100% of your initial investment back plus a return equivalent to 8% per annum (not compounded) as detailed in the table below. If the price level of the Index is below its relevant Step Down Kick Out Barrier Levels, the Bond will continue on to the next Semi-Annual Valuation Date.

### Maturity in 5 Years:

- If the Bond has not automatically redeemed early and continues for 5 years to the Final Valuation Date and the closing price level of the Index is equal to or above its 90% Step Down Kick Out Barrier Level investors receive back 100% of their initial investment plus a 40% gross return.
- If on the Final Valuation Date of (that single day only) the Final Price Level of the Index is below its 90% Kick Out Barrier Level (90% of Initial Price Level), but is at or above its 60% Protection Barrier Level then investors will receive back 100% of their initial investment only and will receive no investment return.
- If on the Final Valuation Date (that single day only) the Final Price Level of the index is below its 60% Protection Barrier then investors' capital will be reduced by the full amount the index has fallen from the Initial Price Level to the Final Price Level. Investors' capital is at risk of total loss.

### Key Dates and Price levels:

- Initial Price Level: The price level of the index is recorded on the 7th March 2025 (closing prices).
- Final Price Level: The final price level of the index is recorded on the 7th March 2030 (closing prices).
- 60% Protection Barrier Level: 60% of the Initial Price Level of the index (closing prices) on the 7th March 2025.
- Semi-Annual Valuation Dates: 9th March 2026, 7th September 2026, 8th March 2027, 7th September 2027, 7th March 2028, 7th September 2028, 7th March 2029, 7th September 2029, 7th March 2030.
- Final Valuation Date: 7th March 2030.
- Step Down Kick Out Barrier Levels: a percentage of the Initial Price Level as illustrated in the table below which is based on a €100,000 investment amount:

If the Index is equal to or above the 90% Kick Out Level (90% of Initial Price Level)	40% (6.96% CAR)	100%	€140,000.00
If the Index is below 90% of its Initial Price Level but greater than or equal to 60% of its Initial Price Level	0%	100%	€100,000.00
If the Index is down by more than 40%	0%	Capital loss of more than 40% (-9.71% CAR) to 100% capital loss	€59,999.99 to €0.00

**WARNING: These figures are estimates only. The value of investments may go down as well as up.**

**Structure:** This Investment Bond is in the form of a Certificate issued by Morgan Stanley B.V., a 100% owned subsidiary of Morgan Stanley. The return of your initial capital invested in this Investment, as well as the Potential Payments, will be dependent on the solvency of Morgan Stanley B.V. as Issuer and Morgan Stanley as Guarantor.

## Illustrations of potential returns (€100,000 invested)

The table below indicates a sample of the potential returns for investors, based on a €100,000 investment, if the product had 'Kicked Out' after 1 year, 1.5 years, 2 Years, 3 years, 3.5 years, 4 years and also some of the potential scenario's at maturity if the Bond ran for the full 5 year term. If after 5 years the Bond has not Kicked Out and the Index is more than 40% below its Initial Price Level, investors' capital will be reduced by the full amount of the negative performance of the Index. Investors' entire capital is therefore at risk.

**Counterparty Risk:** Your investment in the Bond is held in the form of a Certificate issued by Morgan Stanley B.V. a 100% owned subsidiary of Morgan Stanley (A1 / A- / A). Investors will have exposure to the senior counterparty risk of Morgan Stanley B.V. as Issuer and Morgan Stanley as Guarantor. If a counterparty is unable to fulfil its contractual obligations to return funds to an investor this is known as a default. In the case of a Senior Debt default by Morgan Stanley and Morgan Stanley investors would receive the Recovery Value of the Bonds. Please see pages 11-12 for further details on credit risk and the independent credit ratings of Morgan Stanley B.V. as issuer and Morgan Stanley as the Guarantor of the Bonds. Please note this product is not capital protected. Please see terms and conditions page 18 for a definition of Senior Debt.

**Valuation Risk:** The value of this Bond may, during its lifetime, be lower than the amount of the capital invested. As a consequence, the investor may lose part, or all, of the invested amount if they choose to sell their investment before the Final Maturity Date.

**Market Risk:** Before the Final Maturity Date, the value of this Bond is also subject to market risk, meaning it may at any time be subject to significant price movement, which may in certain cases lead to the loss of the entire amount invested. (Please see the "What risks should be considered before investing?" section on pages 12-13 for further details). This is a high risk (SRI risk level 6) investment product.

**WARNING: If on the Final Valuation Date the Final Price Level the Index is more than 40% below its Initial Price Level at the Final Valuation Date you will lose more than 40% of your initial investment amount.**

**WARNING: The return on your investment amount is linked to the solvency of Morgan Stanley B.V. as Issuer and Morgan Stanley as Guarantor, if both were to default you will lose some or all of your investment.**

## What do the credit rating letters mean?

A credit rating is an evaluation of the credit worthiness of a debtor. The evaluation is made by a credit rating agency of the debtor's ability to pay back the debt and the likelihood of default. The credit rating represents the credit rating agency's evaluation of qualitative and quantitative information for a company or government; including information obtained by the credit rating agencies' analysts.

Credit ratings are used by bond buyers to determine the likelihood that the issuer will repay its bond obligations. Each credit ratings agency uses its own individual rating methodology for measuring creditworthiness. Credit ratings can be subject to changes along with changes in the economy, business environment or on issues affecting a specific firm, industry or country.

The table below defines what the credit ratings from each agency actually mean.

## What risks should be considered before investing?

### Summary Risk Indicator:

This is a High Risk product and its Summary Risk Indicator is classified as 6 out of 7, which is the second-highest risk class. The final redemption amount depends on the performance of the Index and could be zero. If on the Final Valuation Date the Final Price Level of the Index is more than 40% below its Initial Price Level you will lose over 40% of your initial investment amount. Your entire capital amount invested is at risk of total loss.

### Counterparty risk on Morgan Stanley B.V. as the Issuer and Morgan Stanley as Guarantor of the Certificates:

By investing in the Bond you also take a credit risk to Morgan Stanley B.V. and Morgan Stanley, Morgan Stanley B.V. in its capacity as Issuer and Morgan Stanley as Guarantor. In the case of a default by Morgan Stanley B.V. or Morgan Stanley investors have a senior claim to Morgan Stanley on the residual amount (if any) up to the nominal value of the Bond. Please see terms and conditions page 18 for a definition of Senior Debt. Please note this product is not capital protected.

### Return of capital at Final Maturity Date:

- 100% of investors' capital is returned at the Final Maturity Date if the product has not redeemed early and the Index has not fallen by more than 40% from their Initial Price Level, on the Final Valuation Date. Otherwise investors' capital will be reduced by the negative performance of the Index, thus the product could potentially incur a total capital loss. (please see examples of illustrative returns on page 8 & 9).

**WARNING: Your capital is at risk; you may lose some or all of the money you invest.**

### Market risks:

- Banks, Equity indices and financial markets are speculative in nature and future prices may trade lower than current prices. A European, or global economic recession may result in stock market indices or financial markets weakening significantly. Global pandemics, wars, military operations, economic sanctions, energy shortages, blockade's, inflation, sovereign defaults, or geo-political or climatic events can cause a disruption to markets. Corporate earnings could fall, dividend levels could decrease. Credit Ratings may change. Economic policies, taxation policy, interest rates, regulations, currency exchange rates, or tax rates may change.
- Investors may not receive any investment return so this investment may result in an opportunity cost where other assets generate a higher return on investment.
- The banking and financial sector can at times be particularly volatile. The stocks with in the EURO STOXX Banks Index are often highly correlated with each other and so can move in similar directions.
- The Index is concentrated in the Euro Zone banking sector. Investors should also note that the top 5 banks make up a large proportion (49.87%) of the Index.
- The EURO STOXX Banks Index (SX7E Index) is a price return index, dividends are not included or reinvested into the Index.
- This Bond is not capital protected and may be subject to significant price movement at any time before maturity, which may in certain cases lead to the loss of your entire capital invested.

**WARNING: If the Index is below 60% of its Initial Price Level on the Final Valuation Date, you will lose more than 40% of your initial investment.**

Inflation has increased, if it remains high or continues increasing over the duration of your Investment and if the returns on your Investment are lower than the rate of inflation this will reduce your purchasing power and what you could buy in the future.

**WARNING: Inflation may have an impact on the performance / value of your investment and on the nominal returns. The contingent (soft) capital protection cannot protect against the effect of inflation over time.**

#### Liquidity risk:

- Morgan Stanley & Co. International plc or its affiliates will use reasonable efforts to quote bid and offer prices. However, they will not be legally obliged to do so. They will endeavour to provide a secondary market for the Bond during the investment term. However, certain exceptional market circumstances may have a negative effect on the liquidity of the Bonds, and even render the Bond entirely illiquid, which may make it impossible to sell the Bond before the Final Maturity Date and result in the partial or total loss of your initial capital invested. It is envisaged that investors will hold the Bond for the full 5 year term and all investors should consider the term before investing.
- Morgan Stanley & Co. International plc or its affiliates will be the sole provider of a secondary market for the Bond. There is no other liquid market on which these Bonds can be easily traded and this may have a material adverse effect on the price at which the Bond may be sold. As a consequence, you may lose part or all of your initial capital invested if you redeem the investment early.

**WARNING: If you invest in this product you may not have access to your money for 5 years.**

#### No recourse to any Deposit Guarantee Scheme (or similar):

- In the event of a default of Morgan Stanley B.V. and Morgan Stanley your investment will not be covered by any Deposit Guarantee Schemes.

#### Risk of product withdrawal:

- If the volume of funds raised for the Bond is insufficient to proceed, or exceeds any pre hedged amounts, or in the event of extreme market volatility, Cantor Fitzgerald Ireland Ltd., at its sole discretion and without notice, may withdraw the product, or cease to accept applications for it. Investments may also be scaled back or reduced and refunded, in whole or in part, before the Issue Date at the sole discretion of Cantor Fitzgerald Ireland Ltd.

#### Hedging risk:

- After the receipt of a completed application form or an instruction to invest in the Bond, any investor or potential investor who then subsequently decides not to proceed with, or to withdraw from the investment for any reason whatsoever, either before or after the Issue date, may then be entirely liable for any hedging costs, breakage costs or bid offer spreads which were incurred by Cantor Fitzgerald Ireland Ltd. in unwinding the position for the investor.

#### Risk regarding deductions during the life of the Bond:

- Deductions for charges and expenses are not made uniformly throughout the life of the Bond, but are loaded disproportionately onto the early period. If an investor sells the Bond prior to the end of the 5 year term, the practice of front-end loading will impact on the amount of money that the investor receives. The investor may not get back the full amount they invested.

#### Early Redemption Risk:

- Prior to Maturity, the value of the Bond may be lower than the original investment amount. As a consequence, the investor may lose part or the entire invested amount if the Bond is sold before the Final Maturity Date.

**WARNING: If you cash in your investment before the Final Maturity Date you may lose some or all of the money you invest.**

**WARNING: This Investment is a complex investment product and may be difficult to understand. Investors should not invest in this product without having sufficient knowledge, experience and professional advice from their Financial Broker to make a meaningful evaluation of the merits and risks of investing in a product of this type, and the information contained in this document and the Base Prospectus.**

#### Prospectus and KID Documents:

Investors should refer to the KID (Key Information Document), the Prospectus and final terms associated to this Bond before making any investment in the product. The KID document is available at <https://cantorfitzgerald.ie/private-clients/structured-investments/>.

It is recommended that investors read carefully the "risk factors" section of the Issuers Base Prospectus and any supplements are available from the Issuer and the Dealer (the "Base Prospectus") dated 12 July 2024 (which sets out the terms and conditions to be completed by the Final Terms) and any supplements thereto are available on the following website: <https://sp.morganstanley.com/EU/Documents> and the Final Terms, when published, will be available at <https://sp.morganstanley.com/EU/Documents/FinalTerms>. These documents can also be obtained free of charge from Morgan Stanley at the internet link stated in this document or from Cantor Fitzgerald Ireland Ltd. upon request.

**WARNING: The value of your investment can go down as well as up.**

If Morgan Stanley B.V. and Morgan Stanley were to default on their Senior Debt you will lose some or even all of the capital invested and any unpaid returns. Please see terms and conditions for a definition of Senior Debt. Should you surrender your Bond early, you will receive the price offered by the Issuer on the secondary market for the Bonds less any encashment costs, which may be significantly less than you originally invested.

**Where does my investment in the Bond go?**

Your investment will be initially lodged to your account with Cantor Fitzgerald Ireland Ltd. and your funds will be held by our custodian “Pershing Securities International Ltd.” a subsidiary company of the Bank of New York Mellon (Credit ratings AA2 / AA- / AA). Before the Issue Date the funds will be transferred to Morgan Stanley B.V. and will be held by Morgan Stanley B.V. until the Final Maturity Date, or relevant Early Redemption Date. Morgan Stanley will provide a financial derivative to provide the investment return. At the maturity date funds will be transferred back to your account in Cantor Fitzgerald Ireland Ltd. and will be held in custody for investors by Pershing Securities International Ltd. We will endeavor to advise you of the amount of funds received and request your instructions at that time.

**What are the costs and charges?**

**Initial Fees**

<b>Illustrative Example of Cantor &amp; Intermediary Costs &amp; Charges Euro Stoxx Banks Index Kick Out Bond:</b>		
<b>Narrative</b>	<b>%</b>	<b>€</b>
Total Amount Invested	100%	25,000.00
Overall Indicative Fee:*	5.25%	1,312.50
Fee Payable to authorised investment intermediary who is appointed by Cantor Fitzgerald Ireland Ltd.	2.5%	625.00
Early Encashment Fee	1%	250.00

<b>Important Notes In Relation to Fees:*</b>
100% of your investment is allocated to the Bond.
Both the Cantor Fitzgerald Ireland Ltd. fee and any fee payable to an appointed intermediary are built into the terms of the Bond and any returns generated are based on 100% of your investment amount.
Where you invest through an authorised investment intermediary who is appointed by Cantor Fitzgerald Ireland Ltd. the fee they are paid is taken from the overall fee received by Cantor Fitzgerald Ireland Ltd. If you do not deal with us through an intermediary this fee is payable to Cantor Fitzgerald Ireland Ltd.
Overall indicative fee quoted above is correct as at the 6th January 2025.
Cantor Fitzgerald Ireland Ltd. receive a fee from Morgan Stanley for the marketing, administration, literature production & distribution of the bond.
An early encashment fee only applies where you have encashed the Bond, in whole or in part, prior to the final maturity date or outside of an observation date.

An indicative composition of costs applicable to your investment is detailed in the KID document. Deductions for charges and expenses are not made uniformly throughout the life of the Bond, but are loaded disproportionately onto the early period. These fees are built into the terms of the bond. However, if the Bond Kicks Out at an early stage the % fee will be higher on an annualised basis than if runs for the maximum 5 year Investment Term.

### Do I have access to my investment?

It is intended that your investment in the Bond will be held for the full 5 year term (or earlier if an early redemption event is achieved). If you need to cash in your investment early, Morgan Stanley & Co. International plc or its affiliates aims to provide, under normal market conditions, a daily secondary market with a 1% bid / offer spread. However neither Cantor Fitzgerald Ireland Ltd. nor Morgan Stanley & Co. International plc or its affiliates can guarantee what its value will be at that point and it may be less than you originally invested. Morgan Stanley & Co. International plc or its affiliates will pay you the value of your investment in accordance with the prevailing market rate at that time, less any associated selling costs. Cantor Fitzgerald Ireland Ltd. may impose a fee of up to 1% to process any early encashment of your investment where such early encashment is possible. We would need to receive an instruction from you in writing to process any possible early encashment of your investment. In the case of joint accounts, corporates/ARF's/AMRF's & Trusts instructions from all authorised persons will be required. Any final return on the Bond will depend on the performance of the Index.

### What happens if I die before the Bond matures?

- Single applicants: In the event of your death, the Bond will be administered in accordance with the instructions of your personal representatives, and/or as part of probate/administration. Any instruction to encash the Bond by a personal representative will be treated in the same manner as an instruction by the original investor.
- Joint applicants: For Bonds invested in the name of a married couple, the Bond will transfer automatically to the name of the surviving partner. For other joint applications, the Bond will be administered in accordance with the instructions of your personal representatives, and/or as part of probate/administration. Any instruction to encash the Bond by a personal representative will be treated in the same manner as an instruction by the original investor.

### What about tax?

Your Investment in The Bond is held in the form of a Senior Bond Issued by Morgan Stanley B.V. Based on our understanding of rates of tax, current legislation, regulations and practice, we expect the final returns from this Bond may be subject to Capital Gains Tax (CGT). Your relevant capital sum and any growth will be returned gross of CGT, currently the rate of CGT is 33%. Tax rates and legislation could change in the future and may be applied retrospectively. This is a general guide only. It is important that you consult your tax advisers concerning possible taxation and other consequences of making an investment in the Bond. Cantor Fitzgerald Ireland Ltd. is not a tax advisor and is not offering any tax advice on this product. Any gains made from the investment by non-taxable investors may be free of tax. Entities such as Corporates, Pension funds, ARF's or Charities should also ensure to complete a W8-BENE Form (available at this weblink: <https://www.irs.gov/pub/irs-pdf/fw8bene.pdf>), or other applicable form, based on your entity type. It is important to keep tax information and disclosures up to date. The taxation of any gains on investments in the Bond made by companies, partnerships or other businesses will depend on the tax position of the organisation. If you are unsure of your tax status or require further information, please contact your local tax office and/or refer to the Revenue Commissioners website, [www.revenue.ie](http://www.revenue.ie). Cantor Fitzgerald Ireland Ltd. does not provide tax advice. Independent tax advice should be sought by each investor.

**WARNING: The Irish legislation does not currently provide a clear categorisation of how this product should be treated for tax purposes. While we believe it may be subject to Capital Gains Tax, it is possible that an alternative taxation basis may apply. This is based on our understanding of current tax law and practice which is subject to change without notice in both Ireland and the UK. This information represents our understanding of the taxation treatment of the Bond but does not constitute tax advice and investors should not place any reliance on the content herein. Investors should satisfy themselves independently of the taxation treatment of the Bond, in relation to Revenue reporting requirements and implications for nondisclosure in their own personal circumstances.**

### How will I know how this investment is performing?

Cantor Fitzgerald Ireland Ltd. and/or your advisor will write to you each year providing an indication of the performance to date of your Investment against your original entry level. Up to date performance details are also available in our monthly Investment Journal which is available on our website: [www.cantorfitzgerald.ie](http://www.cantorfitzgerald.ie)

### What happens when the Bond matures?

Cantor Fitzgerald Ireland Ltd., and/or your advisor will endeavour to contact you prior to the Final Maturity Date of the Investment. On the applicable Payment Date, or the Maturity Date, funds representing the appropriate return of your capital, together with any Investment return due, will be transferred back to your account in Cantor Fitzgerald Ireland Ltd. and will be held in custody for investors by Pershing Securities International Ltd., a subsidiary company of the Bank of New York Mellon (Credit ratings AA2 / AA- / AA). We will advise you of the amount of funds received and request your instructions at that time.

**WARNING: These figures are examples only and are not a reliable guide to future performance. The value of your investment may go down as well as up.**

**WARNING: You may get back less than you invest.**

This investment is in the form of a Senior Bond issued by Morgan Stanley B.V. and Morgan Stanley is the Guarantor. If Morgan Stanley B.V. and Morgan Stanley as the Guarantor, defaults on their obligations defaults on their obligations you will lose some or even all of the capital invested and any investment return. The Investment Return is provided from the pay-out of financial derivatives provided by Morgan Stanley B.V. before the Start Date. Any return is conditional on the fulfilment of the Derivative Counterparty's obligations. In certain, albeit unexpected circumstances, the Derivative Counterparty may terminate or default on the derivative contract before its natural expiry. If this were to happen, the return on the investment to such termination will be calculated using best market practice and no return will be earned on the Bond. In the event that the Derivative Counterparty does not meet its obligations, or if Morgan Stanley B.V. and Morgan Stanley were to default, Cantor Fitzgerald Ireland Ltd. will not be liable for any special, incidental, punitive, indirect or consequential damages or losses of any kind incurred by you arising out of or in connection with the Bond.

**6. Withdrawals**

Your investment in the Cantor Fitzgerald Ireland Euro Stoxx Banks Index Kick Out Bond may be held for the maximum 5 Year Term. If you need to cash in your investment early, we will endeavor to facilitate your request.

However we cannot guarantee what its value will be at that point and it may be less than you originally invested. We will pay you the value of your investment in accordance with the prevailing market rate at that time, less any associated selling costs. Cantor Fitzgerald Ireland Ltd. may impose a fee of up to 1% to process early encashments. We would need to receive an instruction from you in writing to process the early encashment of your investment. In the case of joint accounts, instructions from all parties will be required. No withdrawals may be made without Cantor Fitzgerald Ireland Ltd. and or Morgan Stanley Europe SE's consent prior to the Final Maturity Date. Such consent will be given entirely at Cantor Fitzgerald Ireland Ltd. and Morgan Stanley Europe SE's discretion. Any Final Return on the Bond will depend on the performance of the Index. If you do require access to your Investment before the Final Maturity Date, you will only receive the then present value of your Investment less any applicable fees, which may be less than the original investment.

This information represents our understanding of the taxation treatment of the Bond but does not constitute tax advice and investors should not place any reliance on the content herein. Investors should satisfy themselves independently of the taxation treatment of the Bond, in relation to Revenue reporting requirements and implications for nondisclosure in their own personal circumstances.**

**9. Maturity**

If the Bond has not previously matured early the proceeds of your investment will be paid shortly after The Final Maturity Date. Cantor Fitzgerald Ireland Ltd., and/or your advisor will endeavor to contact you after the Final Maturity Date of the Investment. On the applicable Payment Date, or the Maturity Date, funds representing the appropriate return of your capital, together with any Investment Return due, will be transferred back to your account in Cantor Fitzgerald Ireland Ltd. and will be held in custody for investors by Pershing Securities International Ltd., a subsidiary company of the Bank of New York Mellon (Credit ratings AA2/AA-/AA), in an individual account in your name. We will endeavor to advise you of the amount of funds received and request your instructions at that time.

**10. Variation**

Cantor Fitzgerald Ireland Ltd. reserves the right to amend these Terms and Conditions, subject to the written consent of the Issuer, during the 5 Year Term of the Bond if there is a material, legal, tax or regulatory change affecting these Terms and Conditions. Cantor Fitzgerald Ireland Ltd. and/or your financial advisor will endeavor to notify you of any changes 10 days in advance of changes taking effect.

In the case of any Extraordinary Events as set out in the Base Prospectus ("Merger Event", "Tender Offer", "De-Listing"), then the Calculation Agent (Morgan Stanley & Co International Plc.) may elect one of the following adjustments:

- 1) Adjustment to the terms and conditions;
- 2) Adjustment following the options exchange;
- 3) Redemption in part (in case of basket of shares);
- 4) Redemption in whole;
- 5) Substitution in case of basket of shares in accordance with the criteria in the relevant programme.

**11. Fees**

Cantor Fitzgerald Ireland Ltd. receives a fee for distributing the Bond. Where your investment was made through an authorised financial

advisor they also receive a fee for distributing this Bond, these fees are reflected in the terms of the investment. The account fee for custodian services are set in the questions & answers part of this brochure. Please see page 16 for further details on fees.

## 12. Confidentiality

Cantor Fitzgerald Ireland Ltd. and the Issuer observe a duty of confidentiality about your financial affairs. Neither Cantor Fitzgerald Ireland Ltd. nor the Issuer will disclose details of your investment or your name and address to anyone else, other than to any confidentially appointed agents acting on their behalf or where:

- They are permitted or compelled by law to do so.
- Disclosure is made at your request and with your consent.
- There is a duty to the public to disclose.
- Their legitimate interests require disclosure.

## 13. Adjustment Events

Should any Market Disruption Event, Change in Law or a Hedging Disruption Event (each an 'Adjustment Event') occur during the 5 Year Term, Cantor Fitzgerald Ireland Ltd. shall be entitled, after consultation with the Issuer and at its absolute discretion, (i) to change the underlying Index or stocks; (ii) to unwind the Bond at the then current market value; (iii) to suspend operations of the Bond during any period in which such event continues and thereafter until the end of the Term; (iv) to adjust any relevant terms of the Bond to preserve the economic equivalent of your investment prior to the occurrence of such Adjustment Event; or (v) to adjust the values used in the calculation of the Investment Return as it deems appropriate, having regard to the Adjustment Event in question. As a result of any such Adjustment Event, the Investment Return (if any) may be lower. In the event of a suspension of the Bond, the issuer shall arrange for the investment accrued to be held on terms to be agreed between Cantor Fitzgerald Ireland Ltd. and the Issuer at their absolute discretion. Cantor Fitzgerald Ireland Ltd. will notify the investors of the occurrence of any such event in such manner as Cantor Fitzgerald Ireland Ltd. deem appropriate. Neither Cantor Fitzgerald Ireland Ltd., the Issuer, nor their agent(s) shall be liable for any loss howsoever suffered by the investor if there is any total or partial failure of performance resulting from any such Adjustment Event or any other causes beyond the control of Cantor Fitzgerald Ireland Ltd., the Issuer or their agent(s).

Events affecting the underlying instrument(s) or hedging transactions: In order to take into account the consequences of certain events affecting the underlying instrument(s) on the product or hedging transactions, the issuers prospectus documentation provides for (a) mechanisms to adjust or substitute underlying instrument(s), (b) the deduction of the increased cost of hedging from any due amount, (c) monetization and accordingly, de-indexation of the pay-off formula for all or part of the amounts payable under the product from the underlying instrument(s), and (d) the early redemption of the product. Any of these measures may result in losses on the product.

## 14. Information

These Terms & Conditions represent the terms of the contract between you and Cantor Fitzgerald Ireland Ltd. You acknowledge that your application is made on the basis of and is subject to, these Terms & Conditions and the attached brochure and that you have not relied on any representations or other information (whether oral or written) other than as set forth herein.
