Section I: General

The Fund

This Supplement is issued in connection with the offer of the Cantor Fitzgerald Global Equity UCITS Fund which has six classes of Shares, namely the “Class A Shares”, “Class B Shares”, the Class B (GBP) Shares, the Class B (CHF) Shares, the Class B (USD) Shares and the Class C (USD) Shares. The Directors of the Company may create new classes of Shares in the Fund from time to time, provided that the creation of any such new class of Shares is notified and cleared in advance to the Central Bank. A separate pool of assets will not be maintained for each class of Shares.

The Fund is denominated in Euro.

Investment Objective

The Fund enables investors to invest in a collective capital investment fund operating on the principle of risk-spreading. The investment objective of the Fund is to capture the capital growth potential inherent in equity markets over the long term through investing in a range of transferable equity securities in global equity markets. The Investment Manager will apply prudent diversification criteria to the stock holdings and may hold bonds and cash as protection in uncertain markets.

Investment Policy

The Fund’s investment objective will be achieved by investing in equities listed or traded on Recognised Markets, but may from time to time invest in cash deposits, bonds and UCITS-compliant ETFs (but not, for the avoidance of doubt, ETFs listed in the United States). Any such bonds will be of Investment Grade and shall include, but are not limited to, floating rate notes, fixed and variable rate securities, government bills and bonds issued by governments of EU Member States or OECD member states, corporations, financial institutions and multi-governmental institutions such as the World Bank and the European Investment Bank. All of the transferable securities to be acquired by the Fund will be listed or traded on Recognised Markets. In addition, the Fund may include in its portfolio cash deposits or other ancillary liquid assets, held in accordance with the Central Bank UCITS Regulations.

The equities to be acquired by the Fund will consist of shares issued by a range of companies operating in different geographical regions (including Europe, North America and Asia) and business sectors (including sectors such as financial, healthcare, consumer discretionary, consumer staples, energy, basic materials, telecommunications, utilities, technology, and industrials). The companies will vary in size in terms of market capitalisation.

The Investment Manager may utilise foreign exchange forwards to hedge and/or gain foreign currency exposure. It is intended that the use of such foreign exchange forwards will reduce the currency risk in respect of the Fund and will better enable the Fund to manage its assets and liabilities.

Foreign exchange forwards are agreements to exchange two designated currencies at a specific time in the future for a pre-determined price. The Investment Manager may invest in foreign exchange forwards to provide (i) protection against exchange rate risks on the Fund’s assets and liabilities and/or (ii) foreign exchange exposure, in each case subject to the conditions and limitations set out in the Regulations. The Manager has a risk management process in place which enables it to accurately measure, monitor and manage the risks attached to foreign exchange forwards, and details of this process have been provided to, and approved by, the Central Bank in accordance with the Central Bank UCITS Regulations. Investors should note that returns which are derived from derivatives may be more volatile than returns which are derived from the asset underlying the derivatives. Accordingly, investors’ attention is drawn to the risk factors set out in the Prospectus, and in particular, the sections entitled “Currency Risk” and “Derivatives Risk”.

The Manager, in conjunction with the Investment Manager, shall calculate global exposure and potential leverage pursuant to the commitment approach as permitted under the Regulations. The maximum global exposure and potential leverage created by the use of foreign exchange forwards shall not exceed the limit prescribed by the Regulations (i.e. the Fund’s global exposure and leverage must not exceed the Fund’s total net asset value).

Section I: General

Investment Restrictions

The Investment Manager will apply prudent diversification criteria to the stock holdings. The Fund may invest up to 10% of its Net Asset Value in recently issued equities which will be admitted to official listing on a Recognised Market within one year. In addition, the Fund may invest up to 10% of its Net Asset Value in the equities of unquoted companies.

Dividend Policy

It is currently not intended that the Fund will pay dividends or otherwise make distributions to Shareholders.

Sustainability

The Investment Manager selects investments for the Fund with the goal of meeting the investment objective of the Fund, however, the Investment Manager also seeks to include investments that will promote an environmental characteristic (promotion of the reduction of thermal coal generation and extraction) and social characteristics (the promotion of universal human rights, political rights, political stability and global peace in addition to the prohibition of forced labour) all whilst promoting good governance characteristics.

The Investment Manager will assess each potential investment to determine its suitability from an ESG and/or sustainability perspective based on its proprietary framework in line with industry best practice. To do so, the Investment Manager uses a screen in selecting its investments in order to exclude from investment those companies that do not align with the characteristics promoted by the Fund. Accordingly, the Investment Manager evaluates each investment for both its investment characteristics, and for its environmental and social characteristics. Environmental and social characteristics (and the risks and opportunities that arise from these characteristics) are therefore fully considered by the Investment Manager as part of the investment process. The Fund will report on its promotion of these characteristics at regular intervals to Unitholders.

The Investment Manager also considers governance factors in its decision-making process, evaluating a range of governance factors as part of its due diligence prior to investment, and following investment on an ongoing basis. The risks arising from governance factors are also considered as part of this investment framework.

As the Fund promotes a number of environmental and social characteristics in the manner contemplated by Article 8 of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (“**SFDR**”), further information regarding the environmental and social characteristics promoted by the Fund is available in Annex I to this Supplement.

Integration of Sustainability Risks and Likely Impact upon Returns

The Investment Manager integrates sustainability risks and opportunities into its research, analysis and investment decision-making processes utilised on behalf of the Fund. In applying its screening processes, the Investment Manager makes use of specific methodologies and data into which environmental, social, and governance data from external research companies, as well as its own research results, are incorporated. Assessment of sustainability risks is complex and may be based on environmental, social or governance data which is difficult to obtain and incomplete, estimated, out of date or otherwise materially inaccurate. Even when identified, there can be no guarantee that such data will be correctly assessed.

While the Investment Manager believes that the integration of sustainability risks will be beneficial for the Fund’s performance, the risk arises that the strategies pursued by underlying investee companies may not develop as forecast or may develop more slowly than anticipated, which may negatively impact returns of the Fund and lead to under performance. Investors’ attention is further drawn to the “*ESG Risk*” risk factor contained below. The Investment Manager has implemented a Sustainability Risks Policy which sets out the Investment Manager’s policies in respect of the integration of sustainability risks in its investment decision-making process.

Section I: General

Further information on the manner in which the Manager integrates sustainability risks into its investment decision making process can be found in the Prospectus under the section headed “Sustainability Risk Integration and Impact on Returns”.

Investment Restrictions

As part of its commitment to promoting these environmental characteristics, the following investment restrictions will apply on a binding basis to the Fund:

The Fund will not invest in any company that:

- (a) generates more than 10% of its total annual revenues from thermal coal extraction;
- (b) generates more than 30% of revenue from thermal coal-based power generation;
- (c) breaches the United Nations Guiding Principles (UNGPs), International Labour Organizations (ILO) standards, United Nations Global Compact (UNGC) or Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

The Fund may invest in a company which breaches (c) above if the Investment Manager is actively engaging with the investee company to rectify such breach.

If the Fund holds a particular equity at a time when the investee company breaches the above standards/guidelines, the Investment Manager will engage with the investee company. Engagement is performed and monitored through a norm-based engagement service to which the Investment Manager subscribes. This engagement service pools together investors to engage directly with companies that violate any of the norm-based standards mentioned above in order to work towards rectification of any breach. If engagement has proved to be ineffective in rectifying the issue after a period of one year, the Fund will divest itself of the equities.

In the case of ETFs, the Investment Manager will not invest in any fund where more than 5% of portfolio violate the outlined criteria above.

In respect of sovereign issuers, the Fund will not invest in securities of an issuer that:

- (a) has been flagged for having poor political rights, as measured by MSCI ESG Research;
- (b) has a stability and peace score of less than 3, as measure by MSCI ESG Research; and
- (c) is the subject of European Union or United Nations sanctions.

Risk Factors

Investors’ attention is drawn to the risk factors set out in the Prospectus and to the following additional risk factors.

Shareholders should note that the management fees and expenses incurred by the Fund will as far as possible be deducted from the income of the Fund. If there is insufficient income, the balance will be charged to the capital of the Fund. This may have the effect of lowering the capital value of the Shareholder’s investment.

ESG Risk

Sustainability risks can affect all known types of risk (for example, market risk, liquidity risk, counterparty risk and operational risk), and as a factor, contribute to the materiality of these risk types. Environmental, social and governance (“ESG”) strategies pursued by underlying investee companies will be subject to the risks associated with their underlying investments’ asset classes. Further, the demand within certain markets or sectors that an ESG strategy targets may not develop as forecasted or may develop more slowly than anticipated.

The investments of the Fund or an underlying investee company may be susceptible to various factors that may impact their businesses or operations, including changes to laws and regulations (including, but not limited to, SFDR, the Taxonomy Regulation or other ESG related legislation), costs associated with

Section I: General

government budgetary constraints that impact publicly funded projects and clean energy initiatives, the effects of general economic conditions throughout the world, and increased competition from other providers of services.

Taxation

Any change in the Fund's tax status or in taxation legislation could affect the value of the investments held by the Fund and could affect the return to investors. Potential investors and Shareholders should note that the statements on taxation, which are set out herein are based on advice which has been received by the Directors regarding the law and practice in force in the relevant jurisdiction as at the date of this Supplement and the Prospectus. As is the case with any investment, there can be no guarantee that the tax position or proposed tax position prevailing at the time an investment is made in the Fund will endure indefinitely. The attention of potential investors is drawn to the tax risk associated with investing in the Fund. See section headed "Taxation" in the Prospectus.

Investment Management and Distribution Fees

Investors' attention is drawn to the Fees and Expenses Section in the Prospectus and in Sections II and III of this Supplement.

Establishment Expenses

The expenses incurred in connection with the establishment of the Company are as set out in the section headed Fees and Expenses in the Prospectus and have been equally apportioned between the Initial Funds on the Closing Date. Any Funds of the Company which may be established at a later date may, at the absolute discretion of the Directors, be allocated such portion of the formation expenses of the Company as the Directors consider to be fair in the circumstances.

Compulsory Redemptions

The Directors may compulsorily redeem or transfer any holding of Shares in certain circumstances. See section headed "Compulsory Redemptions" in the Prospectus.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The Fund pursues an actively managed investment strategy that gains exposures to a range of sovereigns and companies through investments in underlying funds and/or direct investments in the equities/bonds of such companies, integrating sustainability criteria throughout the investment selection process. The selection of these investments range across all sectors and focuses on maximising the rate of capital appreciation whilst considering the impact made by the investee company on the environment and society. In selecting its investments, the Investment Manager uses a screen to exclude companies that do not align with the characteristics promoted by the Fund. Further information in respect of this screening process is set out below.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The following elements of the Fund's investment strategy are applied on a binding basis:

1. Sovereign Issuers

The Fund will not invest in securities of an issuer that:

- (a) has been flagged for having poor political rights, as measured by MSCI ESG Research;
- (b) has a stability and peace score of less than 3, as measured by MSCI ESG Research;
- (c) is the subject of European Union or United Nations sanctions;

2. Corporate Issuers

a. Environmental

The Fund will not invest in any company that violates the following criteria:

- i. Generation of more than 10% or more of total annual revenues from thermal coal extraction; or
- ii. Generation of more than 30% of revenue from thermal coal-based power generation.

b. Social

The Fund will not invest in any company that breaches the United Nations Guiding Principles (UNGPs), International Labour Organizations (ILO) standards, United Nations Global Compact (UNGC) or Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, unless the Investment Manager is actively engaging with the investee company to rectify such breach. If the Fund holds a particular equity at a time when the investee company breaches the above standards/guidelines, the Investment Manager will engage with

the underlying company. In the case of ETFs, the Investment Manager will not invest in any fund where more than 5% of portfolio violate the outlined criteria above.

Engagement is performed and monitored through a norm-based engagement service to which the Investment Manager subscribes. This engagement service pools together investors to engage directly with companies that violate any of the norm-based standards mentioned above in order to work towards rectification of any breach.

If engagement has proved to be ineffective in rectifying the issue after a period of one year, the Fund will divest itself of the equities.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

3. Good Governance

The Fund will vote in all eligible corporate actions using sustainability voting guidelines, as described in the Investment Manager's shareholder engagement policy, a copy of which is available at <https://cantorfitzgerald.ie>

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

The Fund does not commit to a minimum rate of reduction of the investments considered prior to the application of the investment strategy.

● ***What is the policy to assess good governance practices of the investee companies?***

The Investment Manager assesses good governance through two different criteria, one for governments and another for the corporations in which it invests. To assess good governance for governments, the Investment Manager uses a proprietary screen that screens out countries which violate severe governance areas, such as labour freedom, civil liberties, and as well political rights. Additionally, screener eliminates any country that is the subject of either United Nations or European Union sanctions as a result of human rights violations.

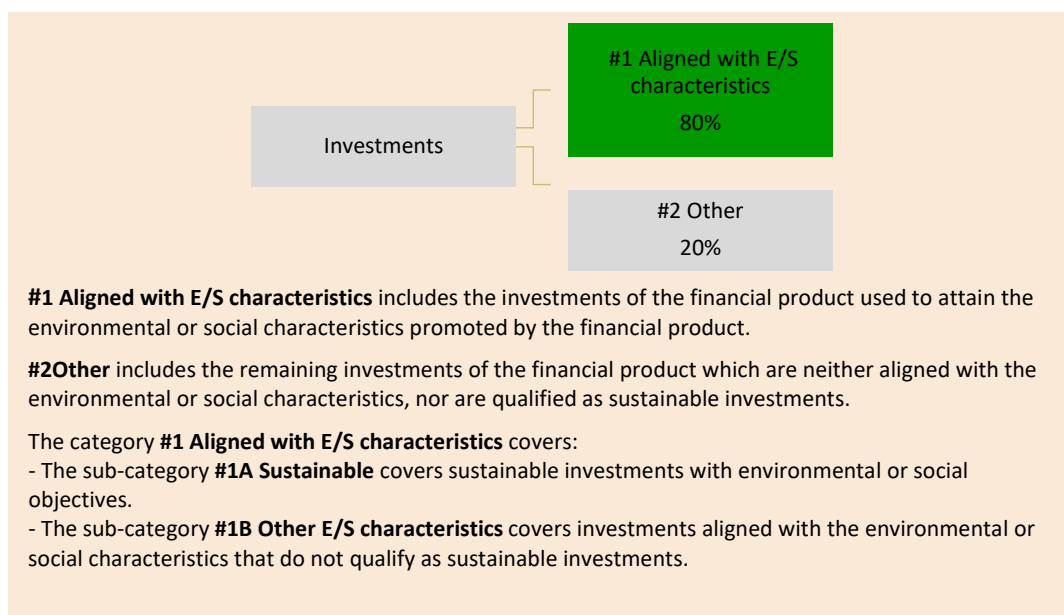

To assess good governance of its corporate investments, the Investment Manager uses a third-party ESG research provider to identify a company's performance in four key governance areas: management structure, employee relations, remuneration of staff, and tax compliance. The Investment Manager uses a proprietary screen to identify companies that it considers are underperforming in these areas. Any companies identified by the screen are immediately subjected to further review by the Investment Manager. This additional analysis sees the Investment Manager consult with additional ESG data providers regarding the performance of the underlying company, with the results of that consultation then being used to further assess performance and confirm the view of the Investment Manager. Once the Investment Manager agrees that an issuer is underperforming in key governance areas, an estimation of scope and relevance will be made. If an underperformance in a governance issue is deemed to be likely material, the Investment Manager will divest from the issuer. For further details on the screen and process used, please consult the Investment Manager's [Good Governance Policy](#).
