Commentary

Global equities were positive during the quarter (+7.89%). Chinese, Spanish and Italian equity markets outperformed. Small cap and value were the best performing factors. Global bonds were flat (+0.72%), and within the asset class, emerging market treasuries and US investment grade corporate bonds outperformed. Commodities were also positive, driven by silver (+28.70%) and gold (+16.77%).

Key Features

Launch date:

12/01/2024

Base Currency:

EUR

Minimum Investment:

€250,000

Risk Profile:

Medium Risk

Objective:

Moderate Capital Appreciation with an Ethical overlay

Account Type:

Discretionary Segregated Account

Summary Investment Objective

This discretionary portfolio has an ethical overlay designed to provide balanced long-term growth. This strategy is designed for investors who have a medium risk appetite and are prepared to accept a moderate level of volatility while accepting that the ethical focus may mean the portfolio may lag wider markets.

Investment Approach

Our approach is a combination of a top down macro-overlay combined with bottom-up security selection. The investment team allocate assets across regions, sectors and styles with the aim of providing investors with what it believes is the optimum portfolio for the prevailing macro environment.

As the strategy invests in underlying funds, the geographic exposure is calculated on a look-through basis and is therefore indicative in nature. Weightings in regional breakdown are indicative only and may change subject to the discretion of the Manager/underlying Fund Manager. There is no guarantee that the fund will meet its objective.

HOLDING UPDATE -

Invesco Global Active ESG Equity UCITS ETF

The Invesco Global Active ESG Equity UCITS ETF aims to deliver superior risk-adjusted returns over the long term when compared with the performance of global equity markets by investing in an actively managed portfolio of global equities that meet a defined set of environmental, social, and corporate governance criteria. Eligible stocks are screened for compliance with the Fund's ESG Criteria, and then scored based on their attractiveness with respect to three investment factors: Value (i.e. companies perceived to be inexpensive relative to market averages), Quality (i.e. companies that demonstrate stronger balance sheets relative to market averages) and Momentum (i.e. companies whose historical share price performance or earnings growth have exceeded market averages). The Fund will hold a sub-set of these stocks, using an optimisation process that seeks to maximise exposure to those investment factors whilst targeting a risk profile that is consistent with the Fund's investment objective.
